

LOCAL CLIMATE ORGANIZATIONS

CITIZENS' CLIMATE LOBBY

A grassroots organization focused on national policies to address the global climate crisis.

CLIMATE REALITY PROJECT

Recruits, trains, and mobilizes people to work for climate solutions that speed our energy transition.

PAUSE/350.ORG

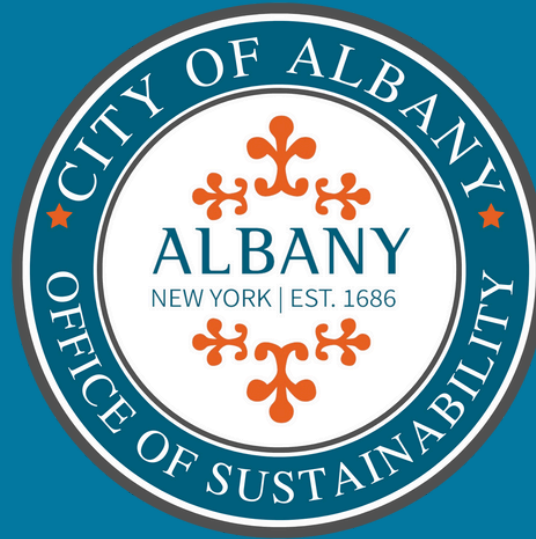

Strives for an end to the fossil fuel economy, replacing it with a just, sustainable system of energy that meets people's real needs.

RADIX ECOLOGICAL SUSTAINABILITY CENTER

Provides a hands-on educational experience to understand the environmental issues we face and the tools needed for solutions.

RIVERS & MOUNTAINS GREENFAITH

Inspires and mobilizes climate and environmental action among people of diverse faiths - including those who are spiritual but not religious.

WHY TAKE ACTION?

Climate change is already here. Storms are more intense. Extreme heat is exacerbating sickness, violence, and food insecurity. Overheating oceans are destroying coral reefs and eliminating fisheries. Wildfires are destroying forests and leaving communities in ashes.

In responding to climate change, we need to center climate justice. Those with low incomes and people of color (who have contributed the least to climate change) face harsher impacts than anyone else and need more resources to reduce emissions and adapt to what is coming.

We are at a tipping point. Scientists report that we have ten years to make rapid and transformative reductions in emissions. If we take action, we can halt and possibly roll back the worst consequences of climate change.

If we don't act, future generations will remember this decade as the time we missed a chance at a more sustainable future.

TEN THINGS YOU CAN DO

REPLACE FOSSIL FUELS

Switch to an EV or install heat pumps to reducing fossil fuel use.

GET AN ENERGY AUDIT OF YOUR HOME

There is funding for free energy audits for homeowners and renters.

WEATHERIZE YOUR HOME

Sealing and increasing the efficiency of your home means using less energy.

PLANT A TREE

Trees take carbon dioxide out of the atmosphere and reduce heat in cities.

COMPOST

Composting limits methane emissions and keeps waste out of the landfill.

MOVE YOUR MONEY

Major banks invest in fossil fuel projects. Use a credit union instead - their investments are more local.

JOIN A CLIMATE ORGANIZATION

Groups are looking for new members & volunteers if you have the time to give.

CALL YOUR REPRESENTATIVES

Ask them to avert climate change and transition us to a renewable future.

VOTE

Vote for candidates who will act on climate. Or run yourself!

DONATE

Donate to a climate organization.
