## Introduction

The Equity Agenda was passed on October 21, 2019. Per Albany City Code §183-3(D), the City of Albany's Commission on Human Rights will work with City of Albany Departments to track outcomes of Equity Agenda goals over time and publish an annual report on the City's progress towards achieving equity. In this report, the City will provide data on the collective actions and policies in the following four areas: 1. Built environment enhancements; 2. Violence prevention; 3. Workforce training and employment; and 4. Education. This is the fifth report the Commission on Human Rights has completed and submitted to the Albany Common Council since the passing of the Equity Agenda legislation. Per the statute, the Equity Agenda report is to be delivered to the Albany Common Council on an annual basis, no later than December 21<sup>st</sup>.

The Commission on Human Rights received this report on 5/17/2024 and provided responses to the Department of Administrative Services on 11/19/2024. This report was then sent to the Albany Common Council on 12/20/2024. Per Albany City Code, the Commission on Human Rights is responsible for reviewing, enhancing and providing recommendations on the City of Albany's Equity Agenda. Included in this submission is the review and analysis of the data provided by City departments, as well as the Commission's recommendations to enhance equity and equitable outcomes in the City of Albany.

## Methodology

Section §183-2 of the Equity Agenda requires City departments to collect data on built environment enhancements, violence prevention, workforce training and employment, and education, and submit it to the Common Council. Section §183-3(D) of the Equity Agenda mandates the City, in partnership with the Commission, to measure progress in the four aforementioned equity areas and to submit its findings to the Common Council. During the review, the Commission reviewed the report, analyzed the data with multi-faceted equity lens, and made recommendations for future policy decisions.

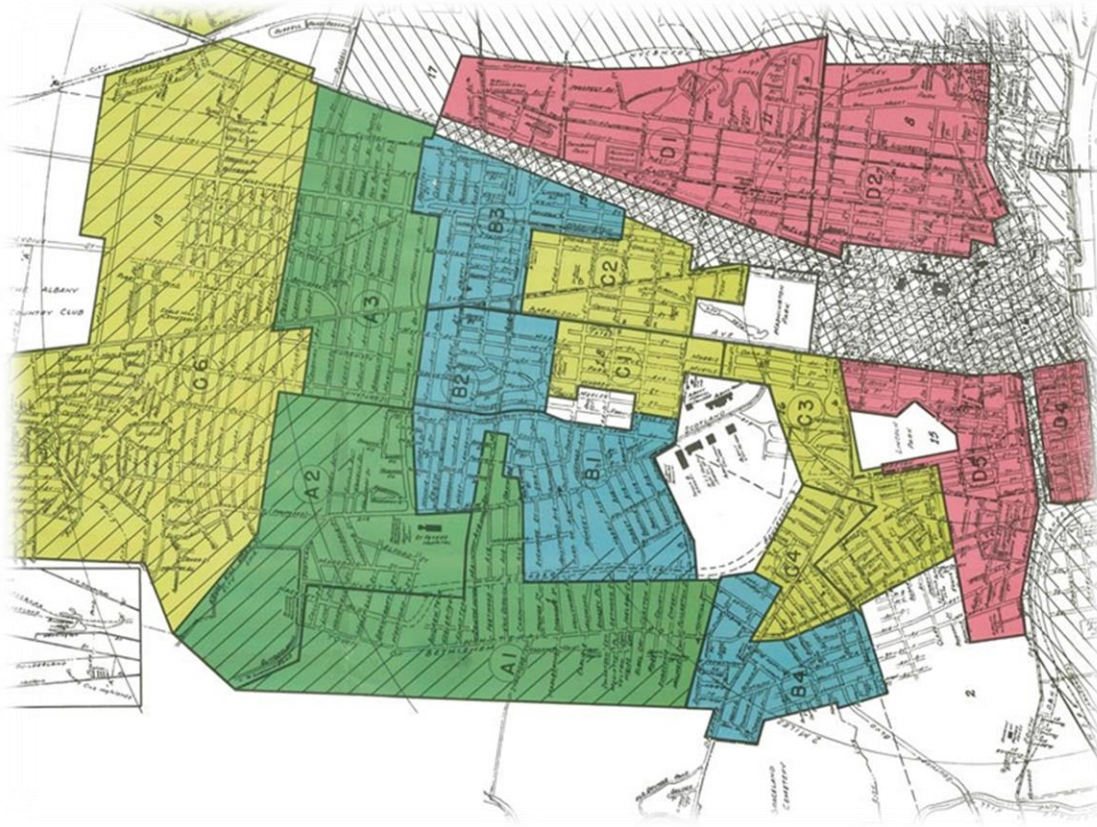

## Defining Social and Racial Equity in Public Administration

Equity is concerned with fairness and justice and is distinct from equality. Where equality requires providing the same to all, equity recognizes individual differences and experiences and the need to make adjustments to offset systemic imbalances. Equity is defined in two ways – social equity and racial equity. The American Society for Public Administration defines social equity as “the fair, just and equitable management of all institutions serving the public directly or by contract, and the fair and equitable distribution of public services, and implementation of public policy, and the commitment to promote fairness, justice, and equity in the formation of public policy.” The Government Alliance on Race Equity defines racial equity as “when race can no longer be used to predict life outcomes and outcomes for all groups are improved.” The purpose of the Equity Agenda is to focus on achieving equity across all communities and ending the injustices caused by institutional and systemic racism and discrimination by focusing on the neighborhoods with the greatest needs.

## Past and Present Effects of Redlining

Redlining is defined as a discriminatory practice that consists of the systematic denial of services such as mortgages, insurance loans, and other financial services to residents of certain areas, based on their race or ethnicity. Redlining was initially established during the 1920s and 1930s through the U.S. government's Home Owner's Loan Corporation (HOLC). In collaboration with local bank loan officers, city officials, appraisers, and realtors, the HOLC created 'residential security' maps of cities based on risk perceptions.

The HOLC contributors created a systemic grading system to determine residential security taking into consideration factors such as parks or dis-amenities, economic class and employment status of residents, and arbitrary factors such as ethnic and racial composition. Below is HOLC's map of the City of Albany.

**Figure 1.** City of Albany HOLC Map from 1938 <https://ncrc.org/holc/>

**A (Green)** “Best”: defined as minimally risky for banks and mortgage lenders, traditionally “ethnically homogenous” and upper middle-class white neighborhoods

**B (Blue)** “Still Desirable”: considered a sound investment area and homogenous neighborhood

**C (Yellow)** “Declining”: characterized by lack of utilities and high rates of older building stock, primarily working class individuals and/or second generation European immigrants

**D (Red)** “Hazardous” areas which were described as having been “infiltrated” with “undesirable populations” consisting of racial and ethnic groups such as Black, Latino, Asian, and Jewish

While the intention of the 1930's homeownership program was to support the economy, the loan worthiness scale and government mapping system that was subsequently created had the effect of establishing a systemic form of race-based housing and neighborhood segregation and discrimination primarily felt by Black and minority individuals and families in Albany's Arbor Hill, West Hill and South End neighborhoods.

Redlining has had a continued impact on the United States and the City Albany. Many residents of Albany's historically redlined neighborhoods experience the long-term and compounding effects of structural racism, including but not limited to disinvestment, inadequate employment opportunities and room for growth, substandard housing, health inequities, environmental injustice, and disparate access to services and programming. Simultaneously, redlining had the effect of encouraging suburbanization by labeling cities as decaying areas, and offering loans and financial incentives to families looking to relocate away from cities.

## City of Albany Ward Boundaries

The City of Albany is divided into 15 wards, or legislative districts, and as a result, much of the information included in this report is broken down by ward. In 2020, the Federal Government completed the most recent census, providing more accurate population counts for the various areas within the City of Albany. These new numbers showed that the populations of the wards were no longer mostly equal. As a result, the City of Albany Redistricting (Reapportionment) Commission amended the ward boundaries to ensure the "one person, one vote" concept. These new ward boundaries will allow the Common Council to provide fairer representation to the people of the City of Albany and ensure that no neighborhood is over or underrepresented.

In March 2023, the City of Albany Common Council passed Local Law P of 2022, setting forth the new ward boundaries that had been drawn by the Redistricting (Reapportionment) Commission. On the next page is a map, which outlines the ward boundaries that existed prior to the enactment of Local Law P of 2022. Despite being legally recognized and integrated into the city code, Common Council members continue to operate within their previous ward boundaries until the next election. While the new boundaries are officially established, they will not practically go into effect until January 1, 2026.

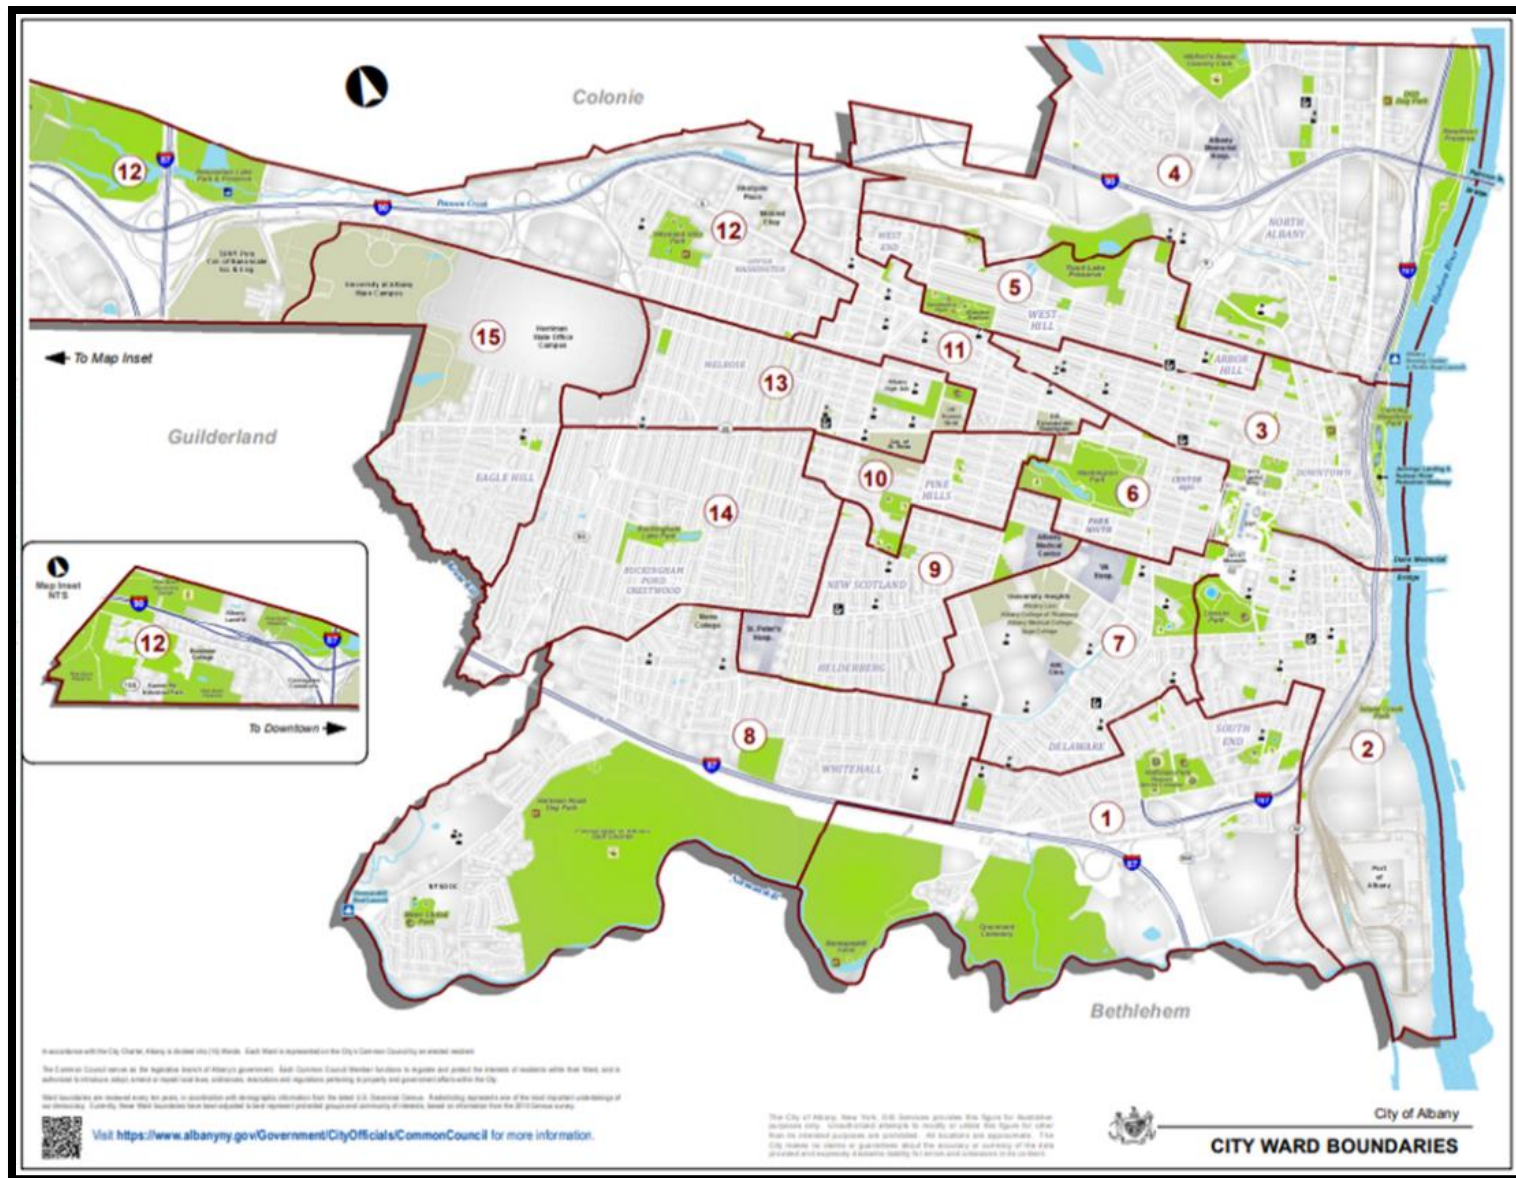

Figure 2. City of Albany Ward Map Prior to Enactment of Local Law P of 2022

## Built Environment Enhancements

### Efforts to Achieve Street Condition Equity Utilizing Street Condition Ratings

Per §183-2(A)(1) of the Equity Agenda: “The City rates streets on a scale of one to ten. A rating of three or lower indicates a need for repair or replacement. The City shall seek to achieve parity among all wards in the proportion of street ratings of three or higher. The City of Albany Department of General Services and Division of Engineering will provide the Common Council with a ward map identifying the rating of each street at the time that it submits to the Common Council its annual proposed list of street and sidewalk reconstructions/enhancements. This map will break down street conditions by percentage within each ward.”

Historically, the City has worked in conjunction with the Capital Region Transportation Council (CRTC) to conduct bi-annual street condition surveys and deliver bi-annual Street Condition Assessment Reports. The scope of the street condition data reporting was revised after adoption of the Equity Agenda, in 2019, to include ward-based street-rating summaries and mapping. The City of Albany utilized this additional data and made efforts to increase the proportion of street improvement projects within City wards which required the most improvement to reach parity amongst other wards.

Based on the results of 2019 and 2021 CRTC data, the City had maintained parity amongst all wards in terms of the percentage of streets scored 3 or lower (which indicates a street in need of immediate repair). Due to the success of City street paving programs, 2019 and 2021 CRTC data indicated no City-maintained streets with a ranking of 3 or lower. The City has strived to keep all poor-condition City streets above this “critical-condition” level so we could continue our success of utilizing more economical and efficient methods of pavement preservation (such as Mill & Fill or Paver Placed Surface Treatment operations). These operations are generally more successful on streets with rankings of 4 or higher; otherwise, more expensive street improvement operations (such as Full Depth Replacement) may be required.

Regardless of the specifics of the law, the City has still sought to balance parity throughout City wards for the percentage of all “poor condition” streets (a score of 5 or lower). Therefore, we have taken on an approach of analyzing ward data during our capital project planning process and increasing the relative proportion of projects within the wards which require the most improvement – as much as practical while also considering numerous other project-selection factors, including:

- Overall budget and time restrictions
- Utility coordination
- Third-party construction coordination
- Construction duration per street location
- Street-specific schedule restrictions
- Project demand (number of requests)
- Requests by Common Council Members and neighborhood associations
- Overall project cost-benefit ratio
- Limiting major disturbance to traffic patterns
- Reducing project mobilization costs (by grouping street locations close together where practical)
- Considering grant-funded project locations
- Increasing maximum benefit to traffic, bicycle, and pedestrian safety

In 2022, the City implemented a new system to rate the ever-changing road conditions through Roadbotics software, which allows for automated rating of City streets through a cell phone, which is

mounted to a City vehicle and driven by City personnel. This method provides the City with more control in the timeline and frequency of street condition ratings. Around the same time, CRTC decided to end their practice of performing human-based “windshield” assessments due to the burden on staff hours and in trend with numerous other municipalities switching to artificial-intelligence-based street condition rating systems. The benefits of Roadbotics software include:

- Potential for annual (or even more frequent) street condition assessments
- Ability to plan assessments for after paving has taken place at a given street location
- Reduction in overall cost to conduct the assessment and reporting
- Ability to analyze roadways in 40 foot sections which improves response to small but critical areas in need of immediate repair
- Removes the potential for human error and bias

While Roadbotics software presents numerous benefits and represents an advancement from our previous methods, we are currently focused on addressing several inherent challenges that are ubiquitous and experienced across various contexts. These challenges include:

- Ability to automatically summarize street conditions by ward and by neighborhood (we summarized 2022 and 2023 Roadbotics data by ward, with the assistance of CRTC and through utilizing other programs)
- Inconsistencies in comparing 2022 and future data versus 2021 and historical data
- Inability to automatically analyze the data on a street block-to-block basis, which is more useful for the street candidate selection process (CRTC also assisted in the creation of displaying Roadbotics data)
- Lack of automatic integration with our sidewalk and ADA curb ramp GIS
- Inconsistencies with how the Roadbotics scoring corresponds to the scoring referenced by the Equity Agenda Legislation

In evaluating which wards require the highest proportion of street improvement projects to obtain equity, we utilize spreadsheets which incorporate the most current street condition data, estimated projections of future street deterioration in each ward, the overall street lane miles within each ward, and account for any known large scale street improvement projects already planned for each ward.

The result is essentially a “weighted demand” for each ward in need. We typically also incorporate “data bars” inside the spreadsheet to help visualize the projected demand (orange in figure below) versus the proposed project list (green in the figure below). For 2023 planning, we still utilized 2021 CRTC data with projections. In the future, we plan to utilize improved automated ratings as part of our equity analysis.

<b>2023 Capital Project Paving List Equity Analysis</b> <b>Projections to Obtain More Equitable <i>Poor-Pavement-Condition Percentages</i> By-Ward</b>										
	2021 Scores				Completed in 2022	Projections	Projections	2023 Street List

**Figure 3.** 2023 Capital Project Paving List Equity Analysis

Notes:

1. The projection is an estimate of paving required to reach 33% (or less) poor condition rated streets for each ward by 2024. The projections account for work completed since the 2021 survey and assume 10% of fair condition streets deteriorate to poor condition streets each year.
2. The Frisbie Ave and Central Ave reconstruction project is planned for 2024 design and 2025 construction. This will improve significant lane mileage in wards 1 and 11.
3. Construction coordination conflicts and higher costs-per-mile-paved have limited the rate of paving we can complete annually within ward 2. We anticipate greater upcoming improvements in these wards because of our coordination efforts with Albany Water Department and National Grid. Hopefully, through visualization of the orange vs. green data bars shown in the figure above, it is evident that our proposed paving plan follows a general correlation to the perceived equity demand in each ward.
4. As construction coordination issues are resolved in the upcoming years, we will strive to achieve a tighter correlation between proposed plan and overall demand. We also hope to implement a similar neighborhood level analysis in the near future.

### Street Condition Data and Effects of Improvements on Street Condition Equity

The following figure show categorical street condition ratings as a percentage of each ward for data collected between 2017 and 2023. The rating methodology changes between 2021 (CRTC) and 2022 (Roadbotics). A conversion was performed in attempts to make the ratings more comparable with each other, but ultimately, significant discrepancies are going to exist between the two data collection methodologies.

Minor modifications to the historic CRTC data and recent Roadbotics data were performed when developing the figures in order to improve accuracy. This included removing roadways, which are not maintained by the City from the scoring averages (such as Port-maintained roads in Ward 2) or adjusting the scores of streets, which were known to be paved soon after they were surveyed. These accuracy adjustments have been standard practice over the past 5 years.

The wards in greatest need of street condition improvement in 2019 were Wards 2, 3, 10 and 14. As of 2023, these wards have seen a very significant increase in overall parity with other wards in terms of relative decreases and increases to the percentage of streets in poor condition and good to excellent condition, respectively.

	Street Condition Percentages, by Ward, by Year														
	% Poor Condition					% Fair Condition					% Good to Excellent Condition				
	2017	2019	2021	2022*	2023*	2017	2019	2021	2022*	2023*	2017	2019	2021	2022*	2023*

**Figure 4.** Street Condition Percentages by Ward by Year 2017, 2019, 2021, 2022, 2023

\* In 2022, the scoring service and methodology switched from CRTC in-person "by-block" windshield surveys to Roadbotics automated 40-foot street-segment analysis. We utilized a scoring conversion to develop the percentages shown, but the results will obviously not correlate perfectly to historic CRTC Data. The scoring conversion is described below.

**Street Condition Rating Description and Conversion**

Streets rated as a 3 through 5 (by CRTC) are considered "Very Poor to Poor Condition" and immediate repair is recommended.

Street segments with a score between 3.5 and 5 (by Roadbotics) were placed within this category.

Streets rated as a 6 (by CRTC) are considered "Fair Condition" and are adequate to drive on but will likely deteriorate to poor condition within a few years.

Street segments with a score between 2.5 and 3.5 (by Roadbotics) were placed within this category.

Streets rated as a 7 through 10 are considered "Good to Excellent" condition and were likely resurfaced within the last 10 years.

Street segments with a score between 1 and 2.5 (by Roadbotics) were placed within this category.

Per the 2023 Data, a higher proportion of improvement is still required in the Ward 2 to reach street condition parity amongst the others. It should be noted that poor utility conditions and utility construction coordination conflicts impeded our ability to mobilize to numerous streets in the Ward 2 over the past 4+ years. However, we have diligently coordinated with Albany Water Department and National Grid to develop a short-term plan which will now allow us to efficiently resurface more streets within the South End and other Ward 2 neighborhoods. The historical nature and historical inequity of Ward 2 created a challenge in immediately obtaining equitable status but we plan to keep putting resources into the ward (and other wards as needed) in our strive to achieve roadway infrastructure equity within the City.

The most recent data also shows that Ward 13 is an outlier in terms of overall streets in good to excellent condition but it should be noted that two large-scale infrastructure improvement projects (Brevator St and Manning Blvd) have been in design development since 2022 and are planned to be under construction for the 2024 and 2025 seasons, respectively. Similarly, the 2022 and 2023 Roadbotics scoring also shows improvement in overall parity between City Wards from 2022 to 2023, as summarized in the figure below:

2022 Roadbotics Results				2023 Roadbotic Results			
Ward	Ward Lane Miles Surveyed	Ward Average Score	Difference From City Average	Ward	Ward Lane Miles Surveyed	Ward Average Score	Difference From City Average
1	36.0	2.49	0.13	1	35.3	2.61	-0.06
2	30.9	2.52	0.10	2	29.7	2.81	-0.26
3	38.9	2.52	0.10	3	34.0	2.46	0.09
4	52.4	2.65	-0.03	4	51.4	2.41	0.14

14	43.2	2.52	0.10	14	43.0	2.28	0.26
15	24.0	2.58	0.03	15	21.4	2.48	0.07
<b>TOTAL</b>	<b>497.6</b>	<b>2.62</b>	<b>-</b>	<b>TOTAL</b>	<b>480.5</b>	<b>2.55</b>	<b>-</b>

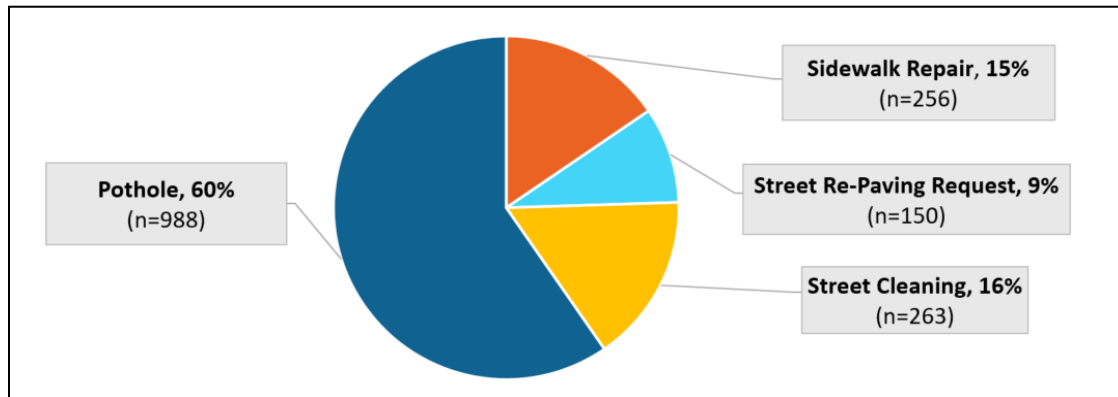

Figure 5. Comparison of 2022 and 2024 Roadbotics Data

The red and green data bars in the figure above are to visualize the difference between each City ward versus the City overall average score for each year (data bars are based on a scale of -1.0 to +1.0). Green indicates the roads are in generally better condition than the average, and red indicates the roads are in generally poorer condition. The 2023 data shows that the bars do not extend as far from the center, which indicates a general improvement in overall street condition parity amongst wards.

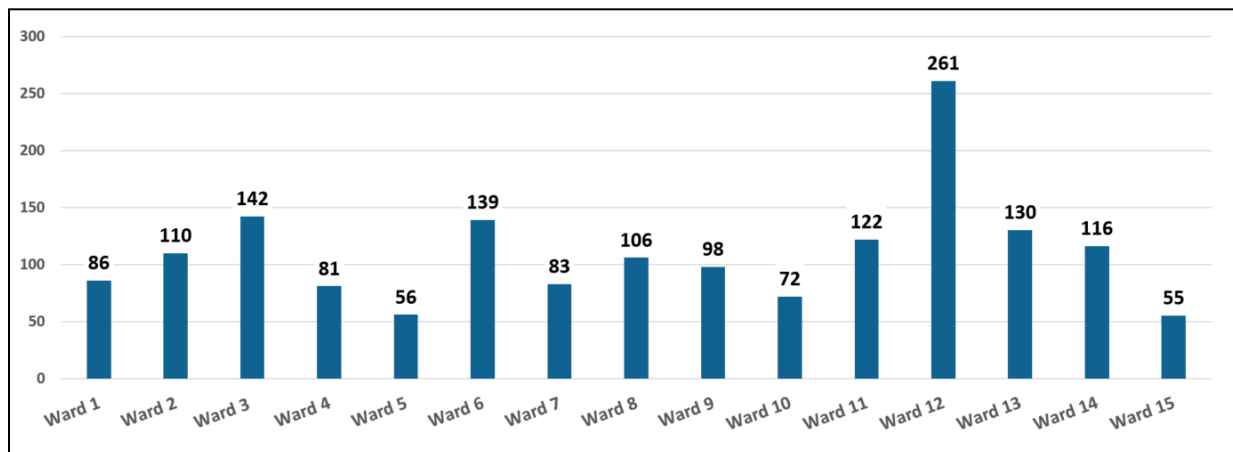

Per our request, CRTC prepared City and ward maps displaying the results of the 2022 and 2023 Roadbotics surveys. The most recent 2022 and 2023 survey maps (overall and by ward) are included in **Appendix A – Pavement Condition Ratings Ward Maps**. Please note that the pre-2022 ward boundaries were still used as this was the basis for our equity analyses over the past 5 years and the historic ward percentages were based on this mapping. In 2024 and the future, we plan to update the ward mapping and ward data to the proper boundaries for each year of scoring.

### Requests for Enhancements of City Streets (SeeClickFix)

Section 183-2(A)(1) of the Equity Agenda requires the Department of General Services (DGS) to keep an electronic record of requests made for the enhancement of existing streets and sidewalks, and requests made for the installment of new sidewalks and walking paths. Recently the Department of Neighborhood and Community Services became the stewards of the SeeClickFix platform. The requests made on SeeClickFix are required to be included as DGS's report to the Common Council. See **Appendix B - Sidewalk and Street Repair Requests** and below for statistics of SeeClickFix requests in 2023.

**Figure 6.** 2023 SeeClickFix Requests for Enhancement of City Streets by Category

**Figure 7.** 2023 SeeClickFix Requests for Enhancement of City Streets by Ward

Ward	# Requests	% of Total Requests	Average Days to Close
1	86	5.2%	48.1
2	110	6.6%	49.9
3	142	8.6%	40.0
4	81	4.9%	45.0
5	56	3.4%	51.8
6	139	8.4%	60.8
7	83	5.0%	55.5
8	106	6.4%	49.9
9	98	5.9%	66.6
10	72	4.3%	59.3
11	122	7.4%	53.9
12	261	15.8%	58.3
13	130	7.8%	60.2
14	116	7.0%	72.2
15	55	3.3%	69.4
Total	1,657	100.0%	56.0

## Street Repaving Methodology

Outlined below is an overview of the Division of Engineering's annual procedure for selecting capital improvement projects, specifically focusing on street resurfacing and sidewalk reconstruction initiatives.

1. Review “High Priority Street Candidate” list which is updated throughout the year with potential street candidates based on: (not listed in any order of precedence)
  - a. Most recent street rating
  - b. Resident complaints
  - c. Common Council Member requests
  - d. Field observed conditions (by Engineering staff)
  - e. Recently completed construction projects
  - f. Street locations vital to pedestrian and bicycle connectivity and safety
2. If available, update list based on most recent street condition survey (currently done through a combination of Roadbotics street scoring/data collection and CRTC GIS formatting and per-ward reporting)
  - a. Identify new poor condition street candidates.
  - b. Update street condition scores for existing street candidates

Note: The City’s goal for 2024-2025 is to build a more automated, City-managed, street condition GIS database which also includes street condition ratings broken down per Neighborhood (as recommended by the Commission for Human Rights in response to the City’s 2022 Equity Agenda Report).

3. Update candidate list to reflect completed and upcoming construction projects by other parties (to help avoid schedule conflicts) and/or damage to a newly paved road
  - a. This practice of coordinating street construction with scheduled utility repairs, likelihood of utility failures, upcoming site development, etc. is both economical and sustainable, as it results in less overall construction operations, and extends the service life of the roadway
4. Review most recent “Street Condition by Ward” summary to identify which City wards need the most improvement
  - a. Identify street projects that are already in the design phase for next year’s construction (for example: previously selected “standalone” street projects, federal aid projects (which are selected based on review of City’s grant applications by the designated local grant review team – usually NYSDOT or CRTC), and third party projects which include roadway improvements.
    - i. Add these streets to the preliminary list and account for them in the projections of street condition by ward and subsequent street equity analysis
5. Internally meet to review candidates and come up with a preliminary list which includes more street candidates in the wards which need the most improvement, but also includes at least one street improvement project in each ward
  - a. The City strives for as close of a correlation as possible to the need per ward, while also taking into account many other factors such as budget, utility coordination, construction coordination, construction timeline and schedule restrictions (for example: only can have

so many streets near schools resurfaced each year as we only allow for these streets to be paved during the school's summer break), roadway demand and overall project cost benefit ratio (how many residents/businesses is the street improvement serving), limiting disturbance to traffic patterns (for example: avoiding too many streets in the same traffic network under construction simultaneously), reducing project costs by grouping street locations close together where practical (reduces contractor's mobilization costs), and striving for maximum benefit to traffic/pedestrian safety (for example: completing a street where we install new sidewalk and bicycle lanes to connect existing pedestrian and bicycle routes)

- b. Per our annual equity analyses of street condition in each ward: In a given year, almost all street projects would need to be contained within a handful of the worst condition wards in order to drastically equalize average ward scores. However, this may be an unrealistic plan of attack for numerous reasons and we ultimately feel a balanced, medium term plan for equity is a more sustainable and practical approach.
  - i. For example: We have been limited in ward 2 / South End Neighborhood due to historic inequity and declining infrastructure restricting the number of street candidates available for paving. Poor condition brick and slate sewers, leak-prone cast-iron mains, and safety hazard lead service water lines should ideally be repaired or placed prior to resurfacing each road and replacing sidewalks. For economical and sustainability reasons, the City prefers to pave streets after the underlying infrastructure has been repaired to prevent future excavation into a recently paved street. Therefore, we have held off on paving numerous street resurfacing candidates until National Grid and Albany Water Department repair/replace their infrastructure first. We have been working closely with these entities over the past few years, and they have made improvements to the underlying infrastructure. This has resulted in more ward 2 street candidates becoming available for paving in the near future (2024 and onward).
  - ii. Additionally: Many of the poor street condition wards and neighborhoods (such as the 1<sup>st</sup> through 3<sup>rd</sup> wards, 5<sup>th</sup> Ward, South End, Downtown, Arbor Hill, West Hill, etc.) have a relatively high percentage of streets which require substantial amounts curb and sidewalk to also be repaired. This is likely due to the historic nature of these neighborhoods and the typically high pedestrian volume of these neighborhoods. It is also possibly due to historical inequity of infrastructure maintenance in these areas. Under the Complete Streets Policy, the City repairs curbs and sidewalks, and adds pedestrian/bicycle transportation improvements on our Capital Street Resurfacing Projects wherever it is practical. Therefore, these streets have a relatively higher cost per lane mile and longer construction time duration per lane mile – these factors limit the rate of progress we can make in these areas each year.
    1. Note: There are also wards and neighborhoods, such as portions of the wards 14 and 15, Buckingham Pond, and Russell Road neighborhoods, which lack equivalent pedestrian and bicycle infrastructure. This is primarily due to historical development conditions and narrow right of way limiting the space to install new sidewalks or dedicated bicycle lanes, which in turn increases the cost and design time of associated project improvements. In opposition to the lower wards, the lack of curb and sidewalk infrastructure has reduced project costs and timeline in these areas and therefore has led to generally better street condition ratings in

these neighborhoods. However, the pedestrian safety infrastructure in these neighborhoods does not appear to be equitable. We do strive to install new sidewalks, curb, signal improvements, and bicycle lanes where we can inside these areas but the immediately feasible options are usually limited and the Equity Agenda does not provide direction to factor pedestrian routes into the project selection process.

6. Send preliminary list to National Grid and Albany Water Department for their feedback
  - a. Remove, replace, and modify list to accommodate a realistic construction schedule and to avoid as many utility project conflicts as possible
7. Check budget restrictions on preliminary list and adjust overall scope of work as necessary. Then develop it into a “draft list”
  - a. Perform a by ward equity analysis based on proposed paving list, most recent street condition ratings by ward, and projected street deterioration
    - i. Provide recommendations for street project revisions to the Department of General Services which will help better correlate project selection to ward needs (as much as can be practically achieved)
      1. The City will strive to include a neighborhood level equity analysis in the future
      - ii. Revise draft list per Department of General Services’ approval
  - b. Send Draft List (with supporting documentation) to the Mayor’s Office for feedback
    - i. Make any necessary revisions as recommended
8. Send Draft List to City of Albany Common Council for approval
  - a. Include supplemental list with ward maps, paving by ward summary tables, and tables showing projected street condition rating changes in each ward

## Parks Equity

Section §183-2(A)(2) of the Equity Agenda mandates investment in parks be based on equity, which is measured by using data retrieved from a parks asset inventory. The Department of Recreation, DGS, and the Albany Water Department are to develop a City-wide asset inventory that includes at a minimum the location and name of each City-owned park, the size of each park, the recreation equipment, the age of the equipment, the designed age range for children using the equipment, ADA access to such equipment, and the number and condition any amenities. Throughout the City of Albany, there are a total of 73 parks, 42 of which offer a variety of amenities. Information regarding those parks can be found in **Appendix C – Parks List and Amenities**. The orange highlights on the spreadsheet indicate new playgrounds created under the administration of Mayor Kathy Sheehan.

To ensure proper park maintenance and beautification, the City has implemented a rotation for inspection of parks every 10 days. However, during the end of June through August of each year the City increases their inspections to every 7 days due to the increased use. These inspections include a safety check on all playground equipment, ensuring no missing, broken or failing parts, and check connections and look for potential hazards. During the summer months, the City also employs additional seasonal staff who conduct daily check-ins of the parks, which include clearing litter, collecting and changing trashcans, and correcting anything missed during an inspection.

The City also regularly checks the landscape of playground area walkways and trails, correcting any safety hazards, and spreading and adding wood chips to those areas as applicable, and trimming all playground, activity areas, and fence lines around athletic courts, spray pads, walkways, and trails. Safety checks are also conducted on courts and spray pads, removing debris, identifying, and correcting any safety hazards, fixing and/or replacing nets or equipment in need of repair or replacement.

## Streetlights

Section §183-2(A)(3) of the Equity Agenda mandates an annual assessment of lighting to ensure streets, alleyways and parks are adequately illuminated. This requirement is now being met on an ongoing basis. The City of Albany utilizes a streetlight asset management system (Signify's Interact City platform) to monitor the streetlight network remotely. The City has a City Operations, Maintenance, and Capital Improvement Contract with the New York Power Authority (NYPA). This contract requires NYPA to continuously monitor the platform for maintenance issues. City staff also have the capability to monitor streetlight outages to ensure reasonable turnaround time on repairs.

Of approximately 10,800 streetlights under the City's ownership, nearly all have already been converted to LED lighting. The City is also in the process of upgrading lighting throughout City parks to LED bulbs and installing equipment to bring these lights onto the City's asset management system.

At any given time, there have been as many as 250 streetlights indicating "communication faults" in the Interact City system. Roughly 25% of these communication fault cases represent actual outages, with the rest simply requiring the reset of their wireless communication nodes. According to NYPA's most recent operations and maintenance assessments, it is expected that no more than 1.5% of City of Albany's streetlights need repair at any given time.

Below are the statistics detailing the types of repairs and response times in 2023. Routine repairs, such as node replacements, fuse replacements, fixture replacements, and arm transfers, make up the majority of repairs. Nearly half of all repairs, including non-routine, emergency, and routine, are completed within seven business days, while almost three-quarters are repaired within 30 days.

Streetlight Repair Information for 2023					
Type of Repair	# Repairs	% Repairs	Response Time	# Repairs	% Repairs
Non-Routine Repairs	180	28%	Within 7 Business Days	254	40%
Emergency Repairs	14	2%	Within 30 Days	193	30%
Routine Repairs	441	69%	Within 60 Days	82	13%
Node Replacements	156		Within 90 Days	55	9%
Fuse Replacements	165		90+ Days	51	8%
Fixture Replacements	33		<b>Total Repairs Complete</b>	<b>635</b>	<b>100%</b>
Arm Transfers	87				
<b>Total Repairs Complete</b>	<b>635</b>	<b>100%</b>			

**Figure 9.** Streetlight Repair Information for 2023

## Sustainability

The pressing global issue of climate change poses one of the most significant challenges of our time. It is evident that burning fossil fuels releases heat-trapping gases, primarily carbon dioxide and methane,

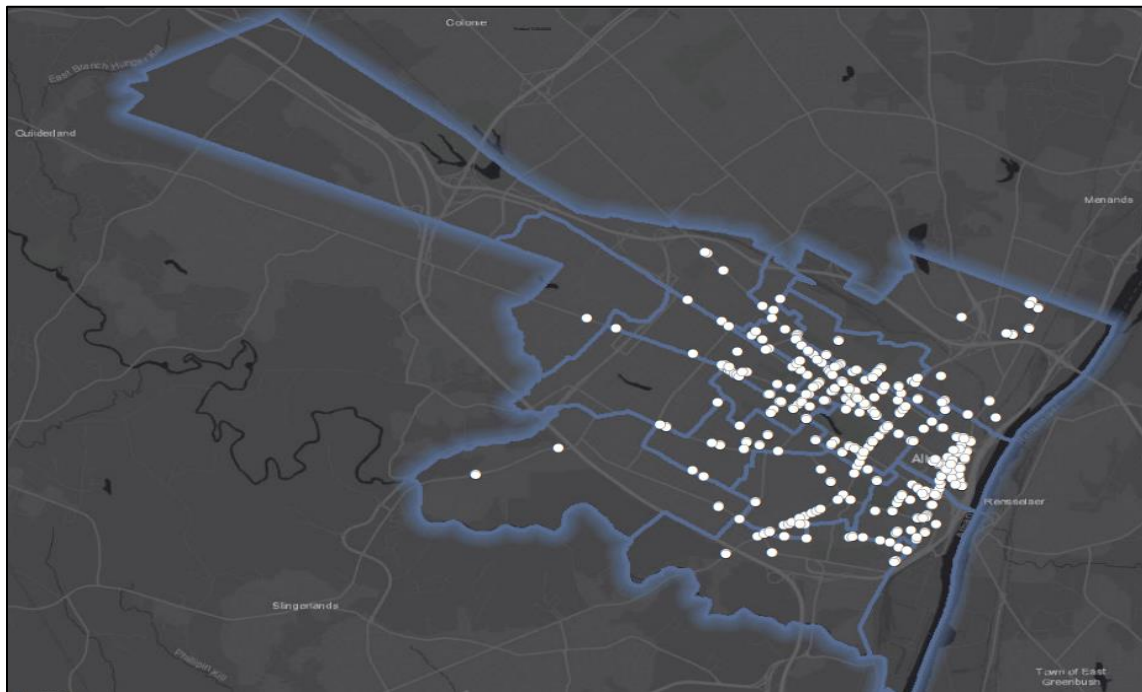

which drive climate change. The City of Albany is fully committed to reducing emissions and preparing for the impacts of a changing world.

In 2023, the Office of Sustainability continued to strengthen its commitment by advancing decarbonization efforts and creating measurable goals to ensure success. The City entered into a power purchasing agreement with NYPA to purchase 100% of its electricity from New York hydropower and formally announced the commitment to become carbon neutral by 2050. The City also successfully received a matching grant of \$100,000 to complete a holistic climate action plan for both internal operations and the community at large.

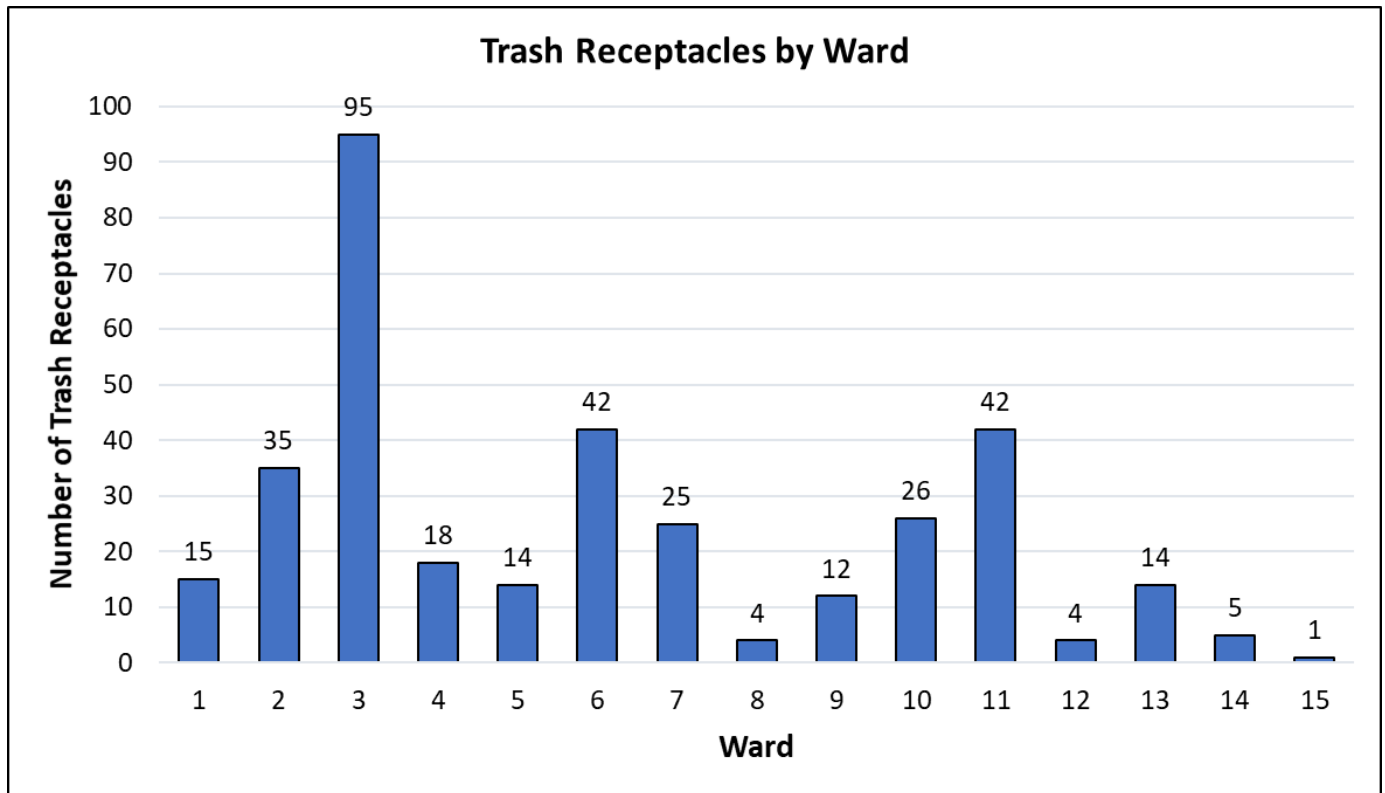

Looking ahead to 2024, the City is ready to initiate a comprehensive planning process, placing community participation and equity at the forefront. This approach will inform policy decisions and program administration, facilitating the City's efforts to develop equitable adaptation and mitigation strategies. These efforts align with our overarching commitment to achieve carbon neutrality by 2050.

### Trash Receptacles

Equity Agenda §183-2(A)(4) mandates DGS to assess if trash receptacles are evenly distributed throughout the City. Trash receptacles are placed around the City in an effort to reduce the amount of litter in public spaces. The receptacles are placed on main thoroughfares that see high pedestrian traffic and where there are businesses that sell items that often end up as litter. Waste barrels may also be placed in locations where litter in public areas is a habitual problem, in which a trash receptacle would improve the litter problem. Trash receptacles are scheduled to be collected every day. In the event of not having adequate staffing to accomplish that task, high foot-traffic areas such as Downtown, Central Avenue, and North and South Pearl Streets are prioritized. The map and charts below show the location of trash receptacles throughout the City.

**Figure 10.** Map of Trash Receptacles

**Figure 11.** Trash Receptacles by Ward

### Capital Projects Completed 2020-2023

Section §183-2 (A)(5) of the Equity Agenda mandates an annual report to detail capital projects executed within the last four years, categorized by ward. These initiatives are overseen by the Department of General Services, Department of Water, and Department of Recreation. **Appendix D – Capital Projects Completed** contains a spreadsheet which outlines each capital project completed between 2020 and 2023. Information includes but is not limited to project descriptions, locations, and the ward(s) served.

Furthermore, the Commissioner of Water has assembled an Equity Agenda Report for the Department of Water and Water Supply, outlining a range of capital improvements and projects related to the water system, sewer system, and lead water service replacement. The report details the prioritization of these initiatives and how they contribute to advancing equity throughout the City of Albany. This report can be in **Appendix E – Albany Water Department 2023 Equity Agenda Report**.

## Violence Prevention

### Violence Prevention Task Force

The Violence Prevention Task Force is responsible for convening stakeholders every fall to develop action items in preparation for the upcoming summer in anticipation of an uptick in violence. The Task Force is composed of members of the Albany Common Council's Public Safety Committee, community members from wards disproportionately impacted by violence, at least one youth representative, representatives from the Albany Police Department, the Mayor's Office, the Albany City School District, clergy, and members from violence prevention-related organizations.

### **Background: A Year of Rebuilding**

The past year has been one of rebuilding for the Violence Prevention Task Force. As noted in its December 15, 2022 report to the Common Council's Public Safety Committee, the Task Force closed its fall 2022 meetings with a call to establish of a dedicated Violence Prevention Coordinator position. The position was recommended to help both reassemble the Task Force—member terms expired in December 2022—and help it fulfill the goals of the Equity Agenda as a consistent link between residents in wards disproportionately impacted by violence, City and nonprofit resources, elected officials, and Task Force volunteers.

The creation of this position was more complicated than anticipated. As detailed below, the \$50,000 allocated to the Task Force via the Common Council's Violence Prevention Activities account under the Contractual Expenditure line was not originally a salary item. The Charter forbids the Council from altering salary totals during the City's annual budget process, and as such, members of the Public Safety Committee agreed to use the funds to contract a qualified consultant as a stand-in for the coordinator. Council staff issued RFP 2023-28 for the Provision of Violence Prevention and Participatory Budgeting Recommendations on July 21, 2023. One firm submitted a proposal for nearly four-times the budgeted amount, and the proposal was not selected.

Committee members then altered the scope of responsibilities to fit that of a full-time staff position and submitted the new job description to the Department of Administrative Services on September 15, 2023. After review and revision with assistance of the Municipal Civil Service Commission, the description was approved on December 4, 2023. The Council has since received applications from 12 qualified individuals. At the same time, it began the process of re-forming the Task Force by issuing an updated Call for Applications this past winter.

While members of the Public Safety Committee serving on the Violence Prevention Task Force continued their efforts throughout 2023, the Task Force itself did not hold or attend any meetings during the reporting period.

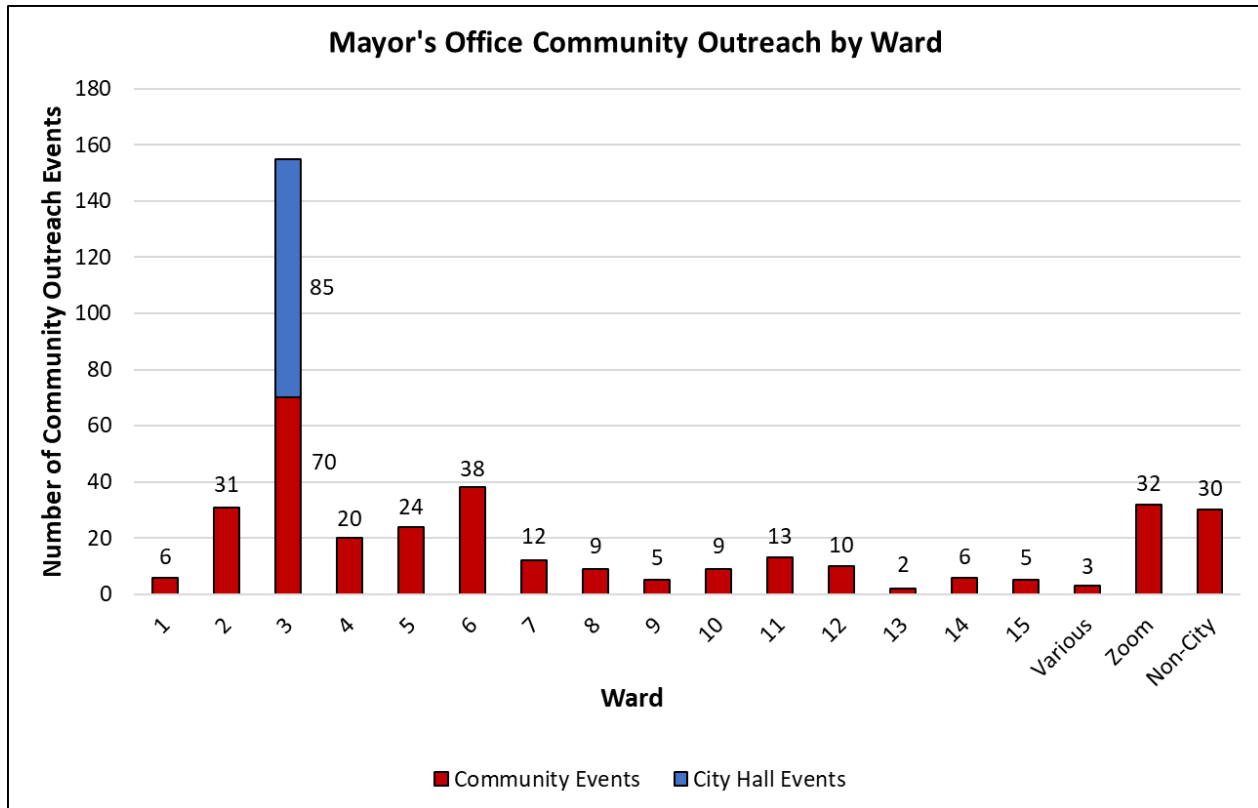

### **Towards a Fully Funded Task Force**

The 2023 Adopted Budget included a \$50,000 Violence Prevention Activities account. Thanks to member turnover and the lengthy processes required to both issue the RFP and create the Violence Prevention Coordinator position, the Task Force reported no expenditures in 2023. The Administration approved the Council's transfer of \$50,000 from the Violence Prevention Activities account to a Violence Prevention Coordinator account after the City's 2024 budget had already passed; Resolution 10.12.24R (MC) officially funded the Violence Prevention Coordinator position on January 18, 2024.

## **Community Programming**

### **Mayor's Office Community Outreach by Ward**

Mayor Kathy Sheehan participated in over 400 community events throughout 2023, demonstrating her commitment to engage with residents and contribute to the improvement of the City of Albany. The following chart shows community outreach events the Mayor attended in 2023 by ward. A significant portion of these events were held at City Hall which is located in ward 3. City Hall events versus community outreach events are distinguished below. For a detailed listing of all events, see **Appendix F – Mayor's Office Community Outreach**.

**Figure 12.** Mayor's Office Community Outreach by Ward

### Community Development Block Grant (CDBG)

Section §183-2C of the Equity Agenda calls on the Albany Community Development Agency (ACDA) to ensure Community Development Block Grant (CDBG) funds are prioritized for organizations that serve communities historically disadvantaged due to racism and discrimination. CDBG funding is provided to not-for-profit organizations in the City of Albany that provide a service to residents of Albany at or below 80% of the Area Median Income. ACDA does have target neighborhoods, Arbor Hill, North Albany, West Hill/West End, and the South End – however, it doesn't limit programming to these neighborhoods. Any resident of Albany that meets the income requirement is eligible for HUD funding. Below are the Year 49 sub-recipients.

Sub-Recipient Organization	Organization Address	Organization Ward	Service Area Ward
Arbor Hill Development Corporation	241 Clinton Ave	6	1,2,3,4,5,6,10,11
South End Neighborhood Tutors	20 Rensselaer St	2	1,2
Public Education & Government Access Oversight Board	161 Washington Ave	3	all
In Our Own Voices	245 Lark St	6	all
Homeless & Travelers Aid Society	138 Central Ave	11	all
Albany Fund for Education	PO Box 3110		1,2,3,4,5,6,8,11
Boys and Girls Club	21 Delaware Ave	6	all
Albany Community Action Partnership	333 Sheridan Ave	6	all
Grassroots Givers	522 Washington Ave	6	1,2,3,5,11

<b>Eden Rose Foundation</b>	498 First St	3	3,4,5,6,10,11
<b>Interfaith Partnership for the Homeless</b>	176 Sheridan Ave	3	all
<b>Black Nurses Coalition</b>	42 North swan St	5	3,5,11
<b>Families in Need of Assistance</b>	69 Brookline Ave	14	all
<b>Public Defenders Association (LEAD)</b>	Seattle, Washington		all
<b>Center for Employment Opportunities</b>	41 State St	3	all
<b>The Red Bookshelf</b>	200 Green St	2	all
<b>Warren &amp; Denise Mackey Foundation</b>	340 First St	3	3,5

**Figure 13.** CDBG Funding Sub-Recipient Organizations

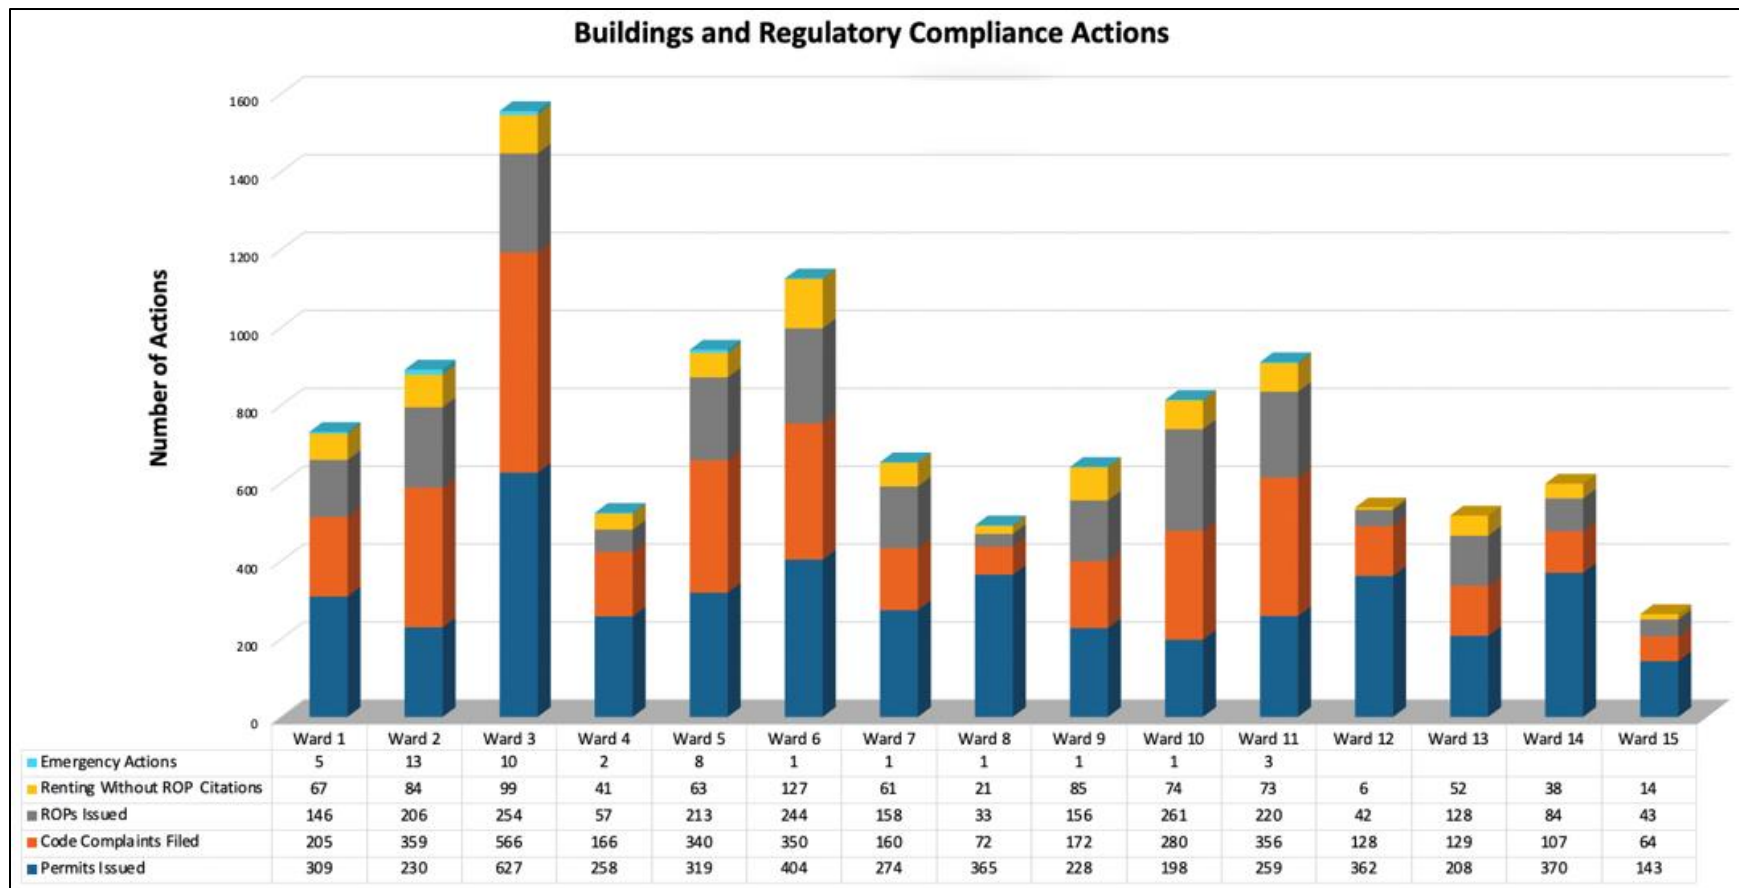

CDBG funding for Year 49 encompasses the period from June 1, 2023 to May 31, 2024 and follows the federal budget cycle. In previous Equity Agenda Reports, we have provided comprehensive insights into various key metrics as listed below.

- Program recipients by ward
- Program recipients by redlining zone
- Public services beneficiaries by racial/ethnic category
- Public services beneficiaries by income
- Housing beneficiaries by racial/ethnic category
- Housing beneficiaries by income

This year, the Department of Administrative Services made a commitment to the Commission on Human Rights to deliver this report by mid-May, ensuring they have adequate time to review and provide recommendations. The adjustment to the timeline means that the information listed above is not available at this time. However, the Department of Administrative Services is prepared to gather this information once it becomes accessible and incorporate it into the final report, which will be submitted to the Common Council following the Commission on Human Rights review process.

### Building and Regulatory Compliance (BRC) Actions

The Department of Buildings and Regulatory Compliance (BRC) protects and improves the health, safety, and welfare of City residents, visitors, and investors by enforcing the City Code and the New York State Uniform Fire Prevention and Building Code effectively, efficiently, and transparently. BRC administers and enforces the Buildings Code, Fire Code, Property Maintenance Code, Plumbing Code, Electrical Code, and Mechanical Code within the City of Albany. The chart below shows a summary of the actions executed in each ward during 2023. Below the chart is a brief definition of each action.

**Figure 14.** Actions Taken by Buildings and Regulatory Compliance in 2023

**Emergency Actions:** Demolitions or stabilizations performed.

**Renting Without ROP Citations:** Properties that are renting out residential properties/units without the requisite Residential Occupancy Permit (ROP).

**ROPs Issued:** Properties issued ROPs during 2023 (properties may have multiple rental units).

**Code Complaints Filed:** Cases opened from complaints. Complaints may come from tenants/occupants, SeeClickFix, on-call cases or another City of Albany agency.

**Permits Issued:** Permits issued for construction, electrical systems, plumbing and mechanical systems, and elevators. These include new construction for residential and commercial units, and building alterations and improvements.

## Workforce Training

Section §183-3D of the Equity Agenda mandates the City and Commission to measure and track workforce training and employment outcomes in its annual report. The City's Department of Youth and Workforce Services (DYWS) administer the following grants and programs. Please note that DYWS has an obligation to service individuals who do not reside in the City of Albany. As a result, some of the information presented in this section includes individuals who are not residents of the City of Albany. In addition, the data regarding age, gender, and race is limited to that has been voluntarily disclosed by participants.

### Summer Youth Employment Program (SYEP)

The City of Albany hosts the Summer Youth Employment Program (SYEP) annually to provide in-school youth between ages 14 and 18 with the opportunity to gain work experience over the course of five weeks. The goal of the program is to introduce and prepare youth for the world of work by opening potential career interests, obtaining valuable skills, and developing transferable work habits. The youth enrolled in SYEP during 2023 earned \$14.25 per hour and worked up to 20 hours per week. For some youth, their participation in SYEP supplemented their household income. Below are some statistics in regard to youth who participated in the SYEP in 2023.

Age	# Participants	Grade Level	% Participants
14 years old	188	8 <sup>th</sup> grade	14%
15 years old	188	9 <sup>th</sup> grade	38%
16 years old	101	10 <sup>th</sup> grade	27%
17 years old	68	11 <sup>th</sup> grade	18%
18 years old	12	12 <sup>th</sup> grade	2%
<b>Total</b>	<b>557</b>		

Figure 15. 2023 SYEP Participants by Age and Grade Level

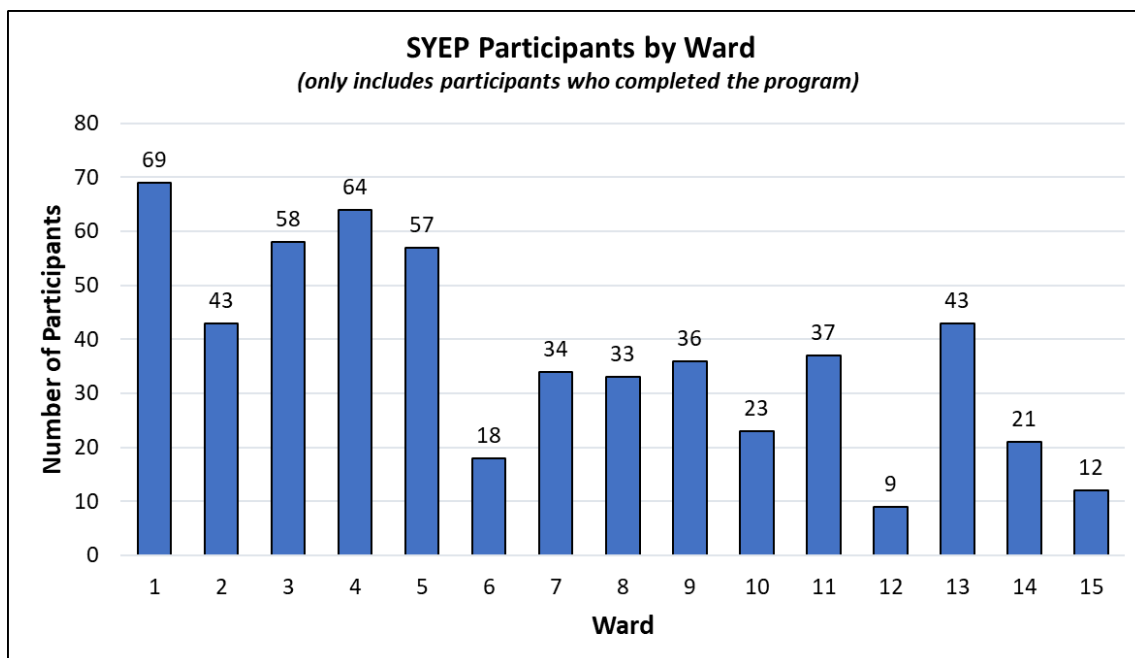

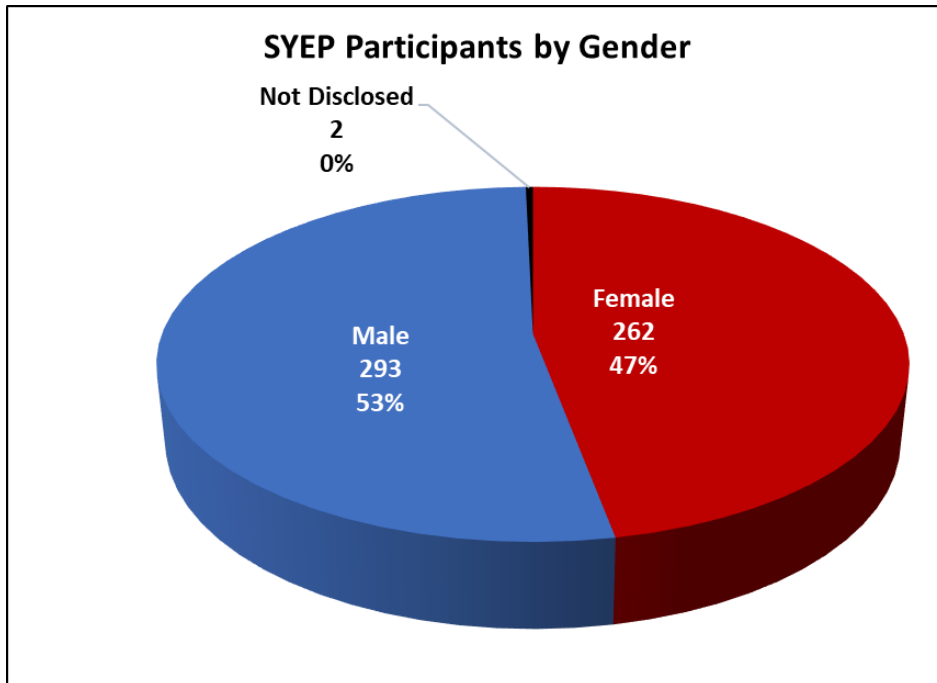

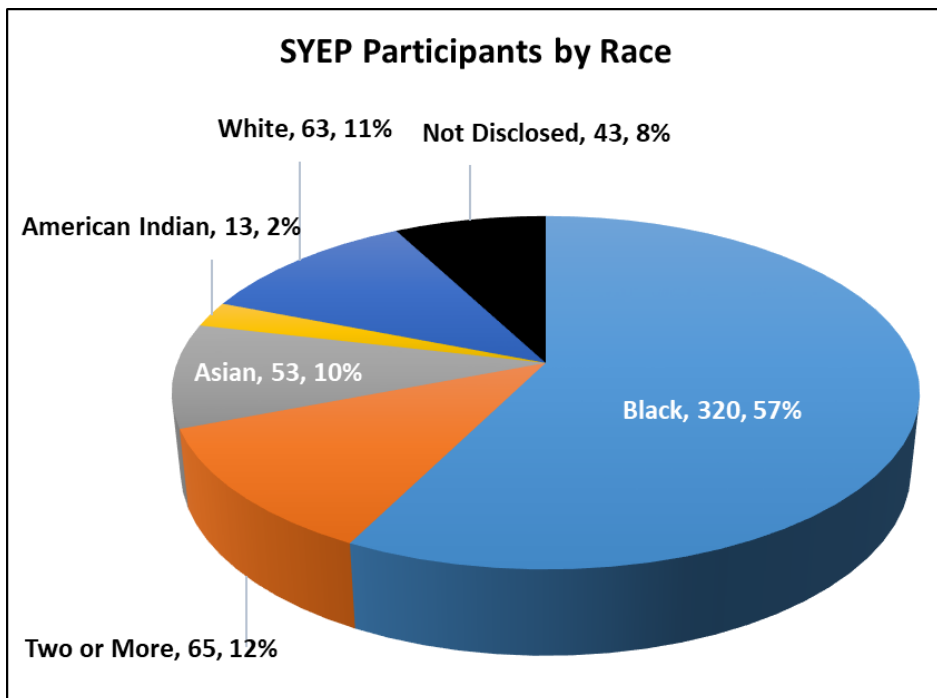

Figure 16. 2023 SYEP Participants by Ward

**Figure 17.** 2023 SYEP Participants by Gender

**Figure 18.** 2023 SYEP Participants by Race

Planning for the 2023 SYEP began in the Fall of 2022. To maximize recruitment, the SYEP team conducted informative sessions at various public, private, and charter schools throughout the City, as well as at the Albany City School District Community Round Table. Albany Public Libraries also had information booths available to the public on a weekly basis. To enhance outreach, a social media campaign was launched

and a partnership was formed with the Albany City School District, which featured SYEP information on their website.

Registration for SYEP opened on February 27 and closed on March 31. Youth interested in participating in the program were required to complete an online application. Following successful application submission, the youth were required to submit proper documentation. The list of required documentation was included in all outreach activities including but not limited to recruitment events, presentations, social media posts, and on the City of Albany website. Documentation drop off occurred at Bleecker Stadium between March 13 and April 14 between 3-6pm, and on weekends by appointment.

SYEP virtual orientation occurred between May 15 and May 21. Using the Mighty Network platform in conjunction with YouTube, participating youth participated in trainings such as workplace behavior and expectations, dress code guidelines, disciplinary procedures, and pay schedule information. Youth were also required to complete the mandatory New York State trainings and surveys.

To kick-off the SYEP, youth participated in enrichment activities to ensure they would have an experience tailored to their goals. The City collaborated with KIPP Charter Schools and the University at Albany and focused on core components such as planning for after high school and post-secondary education, health and wellness, financial literacy and education, and career exploration.

SYEP participants were placed among 107 public, private, and non-profit worksites where they were given the opportunity to gain valuable experience. A new worksite that was introduced in 2023, among others, was the New York State Department of Civil Service. This partnership opened the door for collaboration and support from 20 New York State agencies including but not limited to New York State Inspector General, Office of Diversity and Inclusion, Department of Labor, and Education Department.

### Workforce Innovation and Opportunity Act (WIOA) Grant

The Workforce Innovation and Opportunity Act (WIOA) Grant offers services to eligible individuals seeking to improve their job skills. Participants can choose from a selection of training providers in New York State and are encouraged to actively manage their career prospects by utilizing various resources, including skills assessments, labor market information, and training providers' performance. Their success is gauged by their program completion, attainment of credentials, and transition to successful employment.

DYWS allocated \$415,778 in funding to assist participants in obtaining credentials, educational training, and support services in industries like transportation, healthcare, manufacturing, and construction. The hourly wage ranged from \$18.00 to \$30.00, and 112 participants (43%) obtained credentials throughout the course of the program.

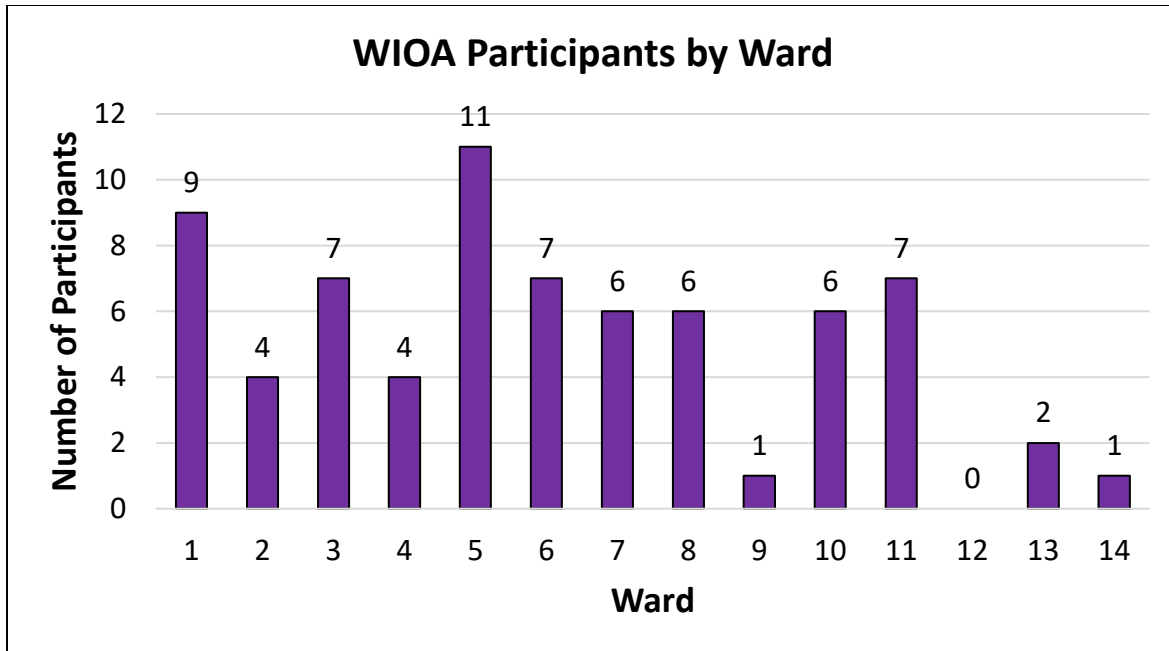

It is important to note that there are gaps in the process, both in obtaining credentials and securing employment in the chosen career pathway. For instance, nursing students must excel in academic and clinical testing to demonstrate mastery of the required skill sets for board certification eligibility. The accompanying figures provide insights into the program, including job placement details, cost, and demographics of participants.

Categories of Workers	Associated Costs
WIOA Adult	\$255,916
WIOIA Dislocated Worker	\$159,862

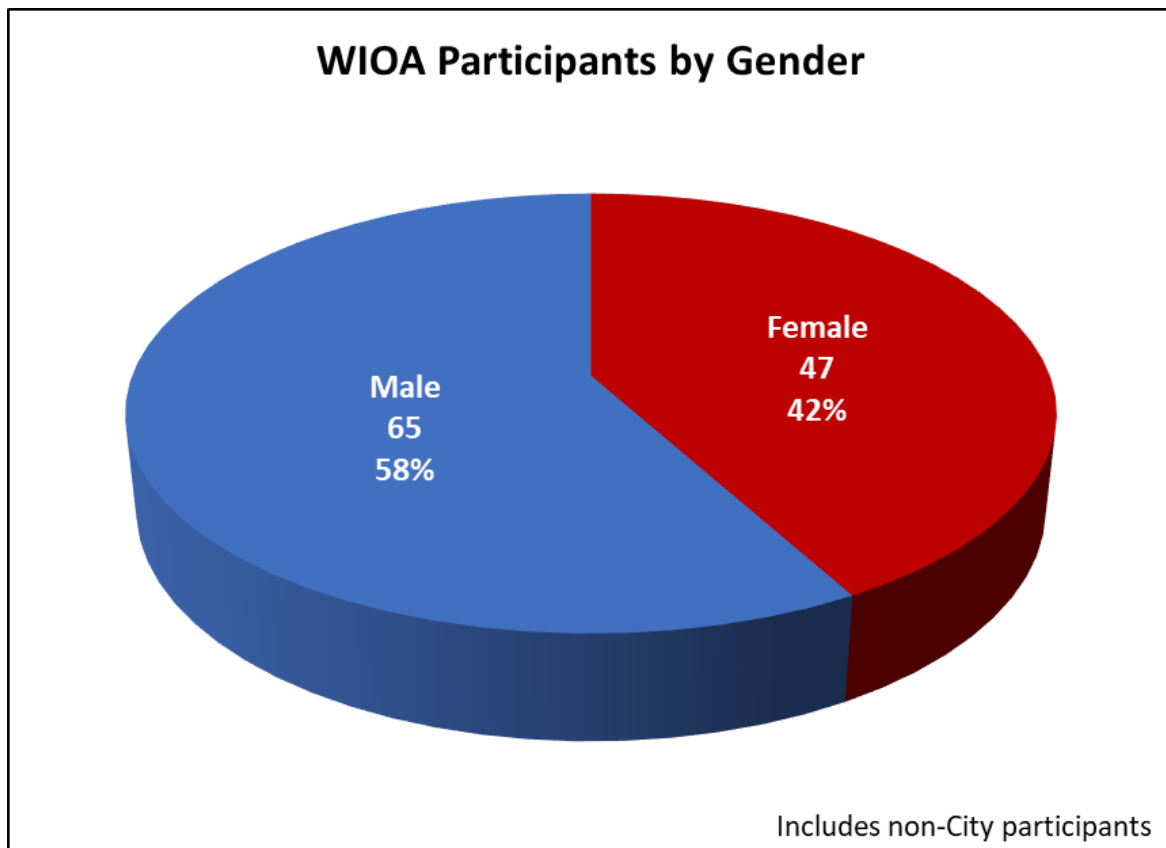

Figure 19. – Costs Allocated to WIOA Program

Employment Entity	Vacancy Filled	Hourly Rate
Valvoline Instant Oil Change	Technician	\$15.00
Capital Cardiology Associates	Clinical Medical Assistant	\$17.50
Fort Orange Press LLC	Customer Service	\$20.00
City School District	Clerk	\$15.00
Community Health Care Associate	Phlebotomy Technician	\$17.50
City of Albany Department of General Services	Truck Driver	\$20.00
Cornell University	Web Developer	\$22.00
United Postal Service	Customer Service	\$15.00
Catholic Charities	Direct Service Support	\$17.50

### My Brother's and Sister's Keeper (MBSK)

On February 27, 2014, President Obama launched the My Brother's Keeper Initiative, a unique approach that focuses on critical challenges, risk factors, and opportunities for young boys and men of color at key life stages. This approach, which has been expanded by the City of Albany to include young girls and young women, recognizes the need for all youth to improve their long-term outcomes and ability to contribute to society. The local chapter of My Brother's and Sister's Keeper's goal is to reduce violence among young people and improve access to education and employment. Primary indicators of performance are evaluated during the program follow-up period. Successful outcomes include unsubsidized employment, secondary education, high school equivalency attainment, post-secondary education, and occupational skills training.

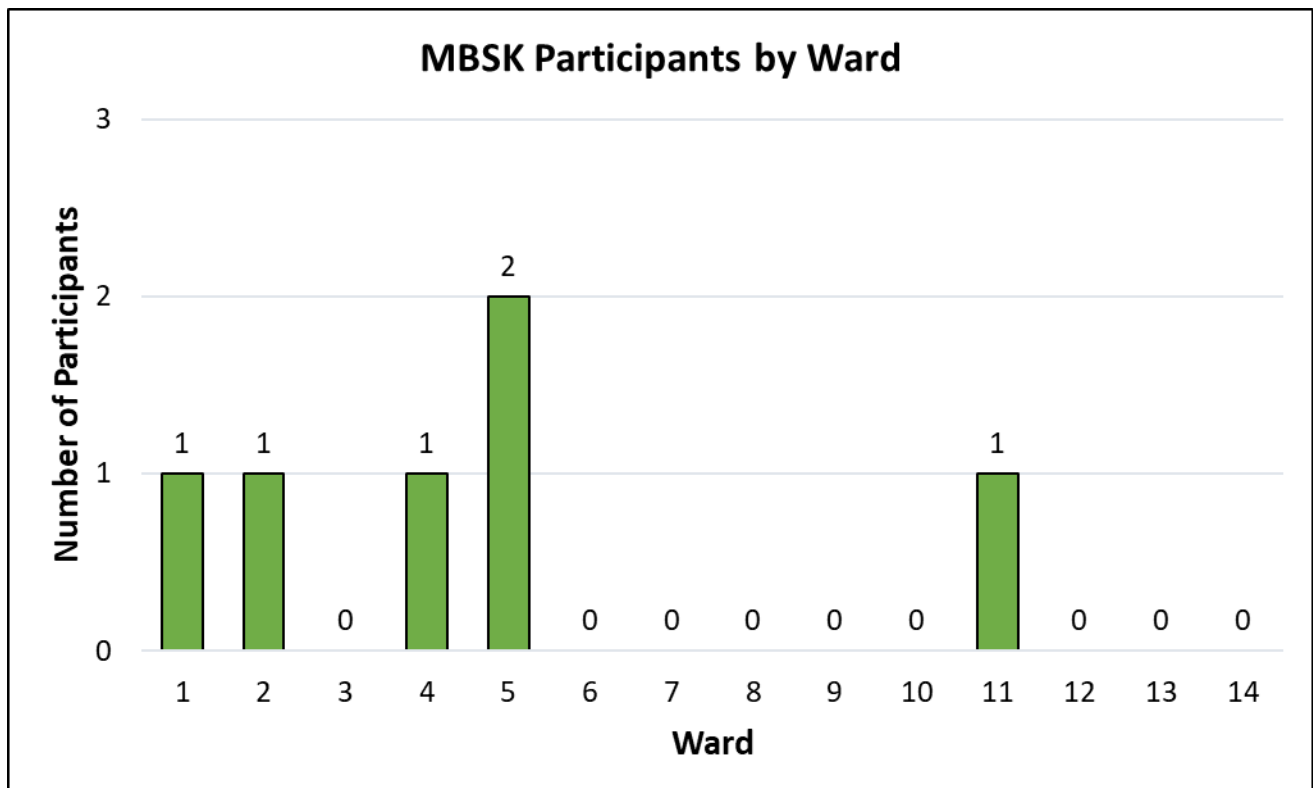

The program participants has the opportunity to engage in practical workforce development training including resume development, mock interviewing, and career exploration. They also were able to visit local businesses such as Plug Power, City Hall, Albany Nanotech, and others, to gain firsthand experience and insights. These experiences have not only enriched their understanding but also equipped them with valuable skills. Additional activities included attending hiring events, exploring community resources and services, and receiving mentoring to support their personal and professional growth. Participants also

completed community service hours by volunteering at local food pantries, and have been provided with mental health assessments and counseling services to address any barriers they may be facing. Additional referrals have been given to participants to address housing, medical, and transportation barriers utilizing the Healthy Alliance Platform.

The total program cost was \$74,271.00 and the total cost of stipends awarded to participants was \$23,626.53. Additionally, participants were given CDTA bus passes based on their attendance. Below are the disclosed statistics related to the program.

### Gun Violence Prevention (GVP) Initiative

In 2022, the New York State Governor's Office initiated a job program aimed at young adults aged 18 to 24 residing in areas with high rates of gun violence. This program, known as the Gun Violence Prevention (GVP) Initiative, is innovative by directing its efforts toward specific local areas identified by zip codes and treating gun violence as a public health issue. The primary objective of this initiative is to offer a comprehensive strategy to create a safer New York, encompassing both short and long-term measures for intervention and prevention to disrupt the cycle of violence. The Governor's Office has extended the program until March 2024.

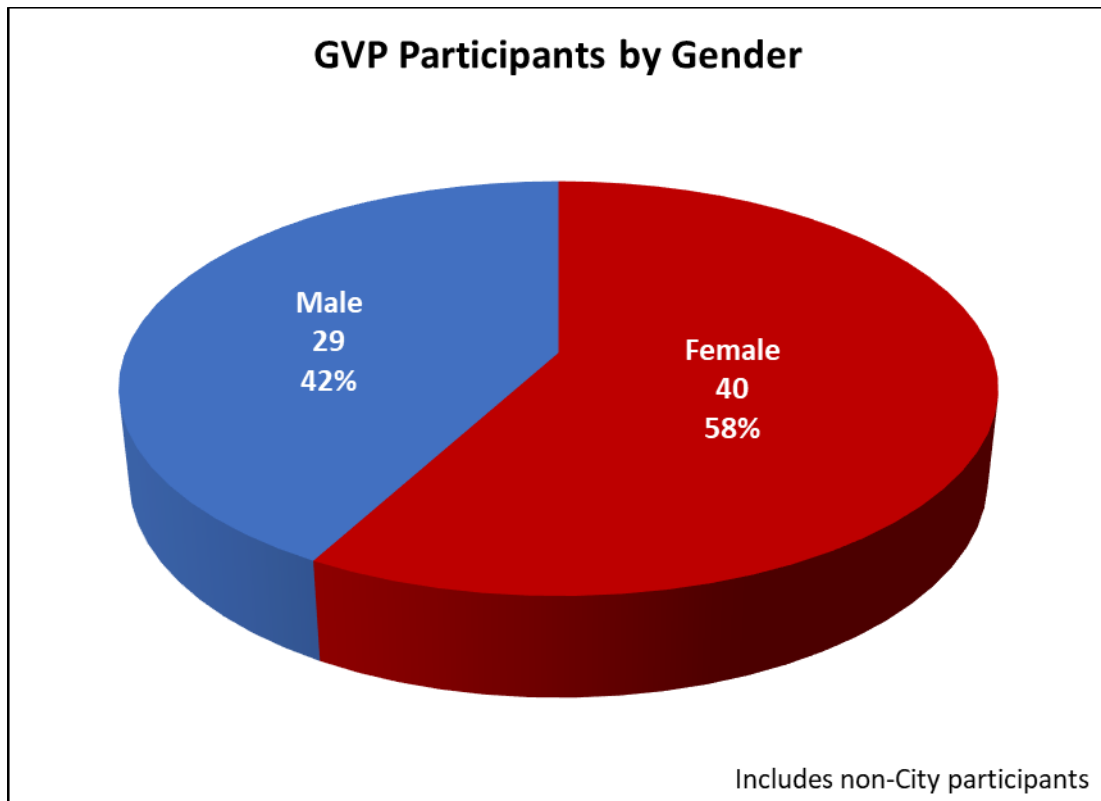

In 2023, there were 69 GVP participants enrolled. The program caters to young adults who are unemployed, underemployed, or out of school, achieving this through community partnerships, specialized training, hands-on work experience, and workforce development. These components collectively contribute to building careers and facilitating sustainable employment. The initiative had 69 participants enrolled in 2023, with a total stipend amount of \$29,743.73 awarded for their participation in Career Readiness and Leadership Training. As of March 2024, most participants are currently enrolled in specialized training as a Licensed Practical Nurse or in Off Shore Wind. Credential attainment and employment outcomes are ongoing. The statistics below shows participants by age, ward, gender, and race.

## City of Albany Employment

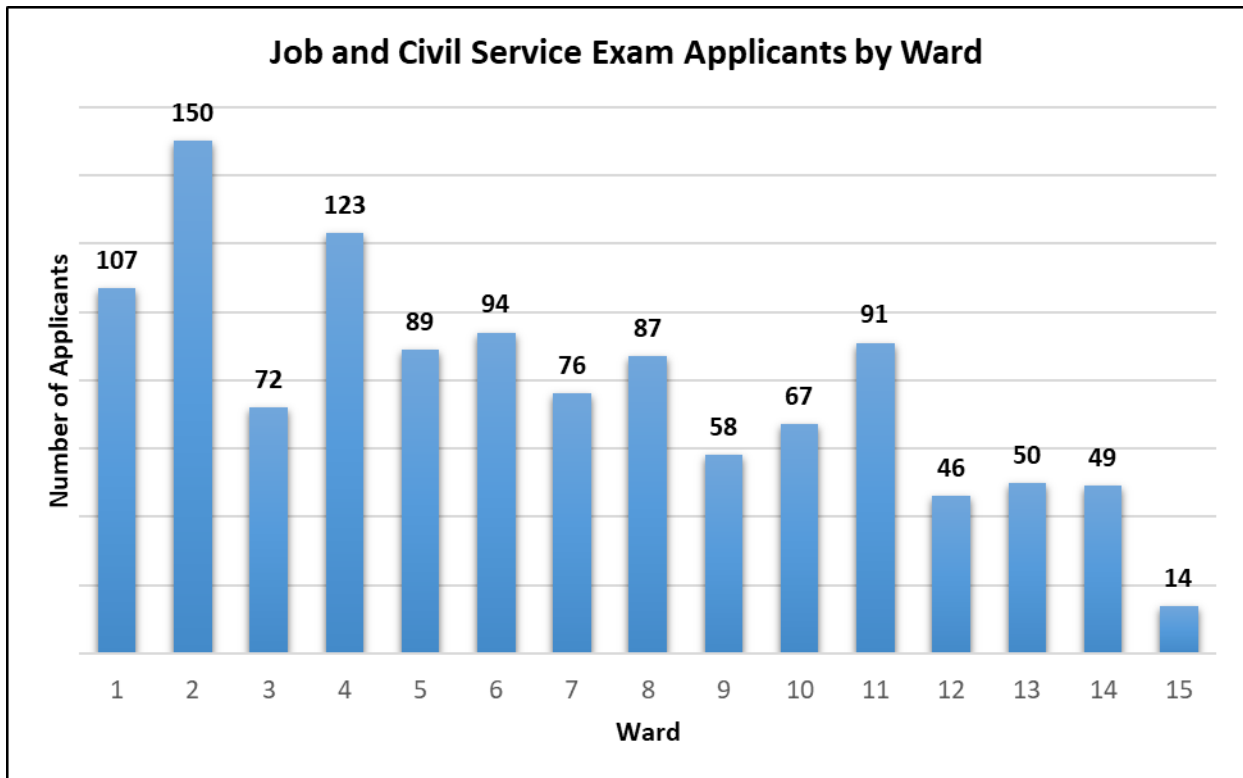

### Job and Civil Service Exam Applicants

As a New York State municipality, the City of Albany employment is governed by Civil Service Law. For positions that fall into the competitive class, the City is required to hire and promote from a list of candidates who have passed a civil service exam for a particular position title. Civil service exams assess candidates' knowledge, skills, and abilities necessary to performing the job. The objectives of civil service exams are to provide job selection based on merit and foster fair and open competition. For positions that do not have an active list, the City may make a provisional appointment. If an appointment occurs, that employee will need to take the exam for their position title when it is offered and score a high enough score in order to be considered permanent in their position.

The City advertises its open positions and upcoming civil service exams on its employment portal ([www.jobs.albanyny.gov](http://www.jobs.albanyny.gov)) as well as on the Join Albany ([www.joinalbany.com](http://www.joinalbany.com)) page which became available to the public in March 2023 at the official kickoff of the Join Albany Recruitment and Retention Campaign. Some exams are offered on a one-off basis, and others are continuous recruitment exams that occur on a more frequent recurring basis. In order for a prospective job seeker to be hired for a position with the City of Albany, they must submit their job or exam application through the employment portal. The Office of Human Resources then reviews their application and determines whether or not the candidate is qualified for the position or exam. If the candidate has applied for an exam and is considered qualified, the Office of Human Resources will email them an admittance notice with details about the exam. In 2023, the City of Albany received a total of 5,281 job and exam applications – 4,249 job applications and 1,032 exam applications. Of those applicants, only 26% (or 1,390) listed their residence city address as Albany. Below is a map and chart of the City of Albany which includes location points of the residence addresses of job and civil service exam applicants in 2023.

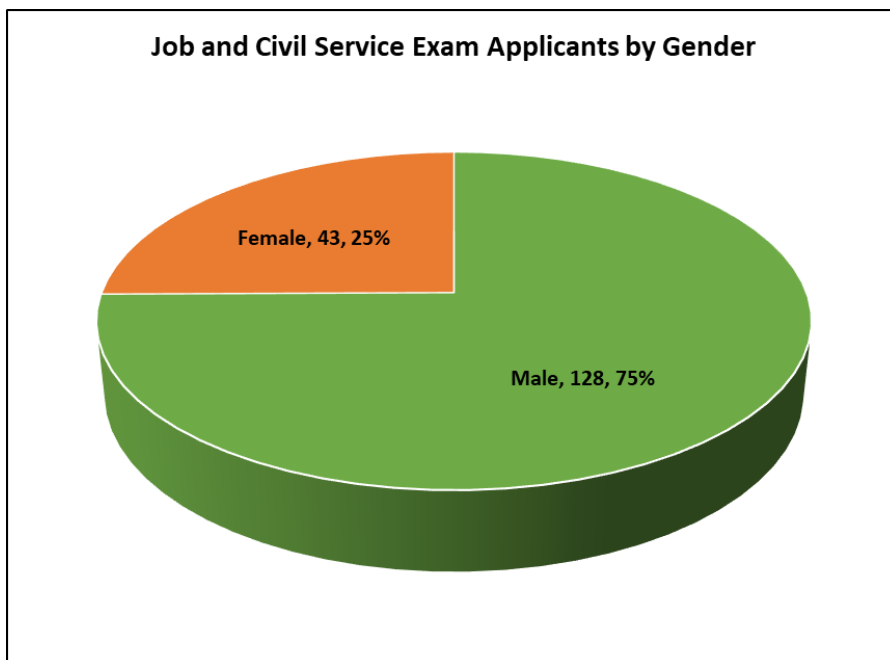

**Figure 33.** Map of City of Albany Job and Civil Service Exam Applicants

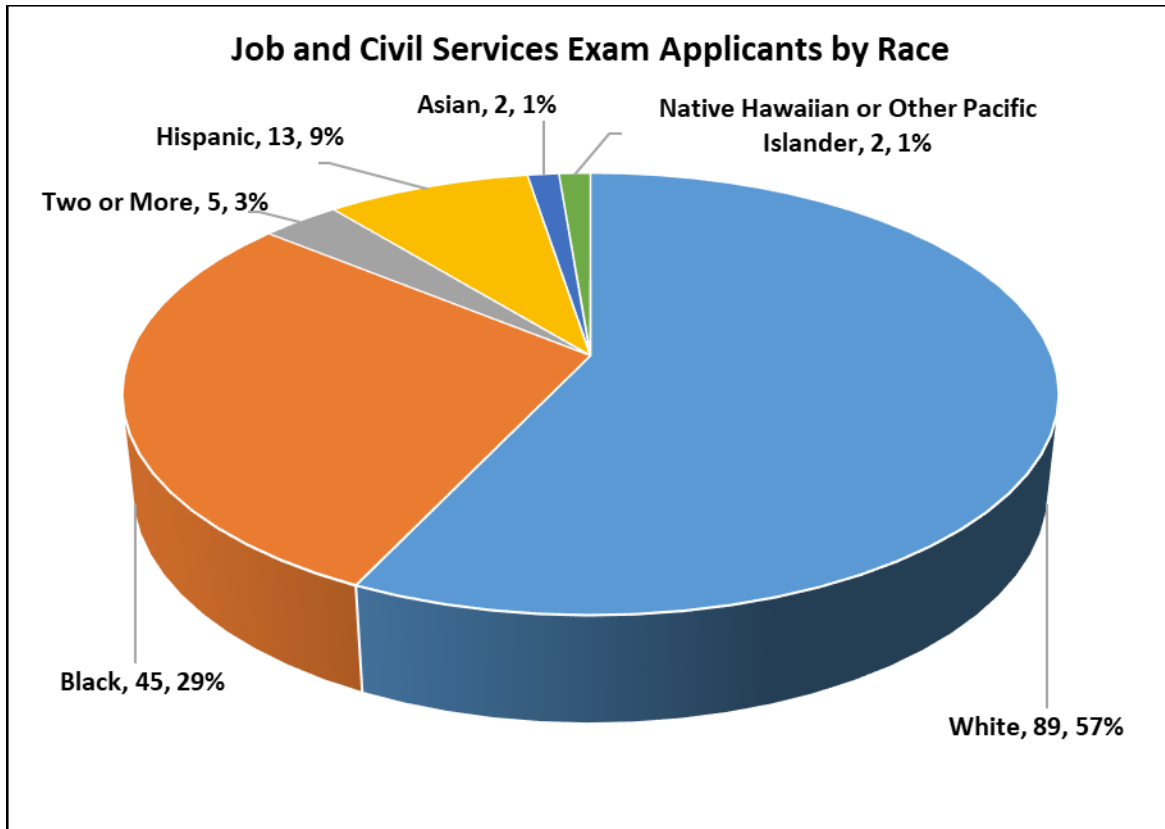

**Figure 34.** Chart of City of Albany Job and Civil Service Exam Applicants by Ward

When applying for a City of Albany job or civil service exam, an applicant is asked their gender and race. Applicants have the option to skip these questions if they choose. In 2023 a total of 171 applicants responded identifying their gender and 156 applicants responded identifying their race. Below is the breakdown of these applicants.

**Figure 35.** Job and Civil Service Exam Applicants by Gender

**Figure 36.** Job and Civil Service Exam Applicants by Race

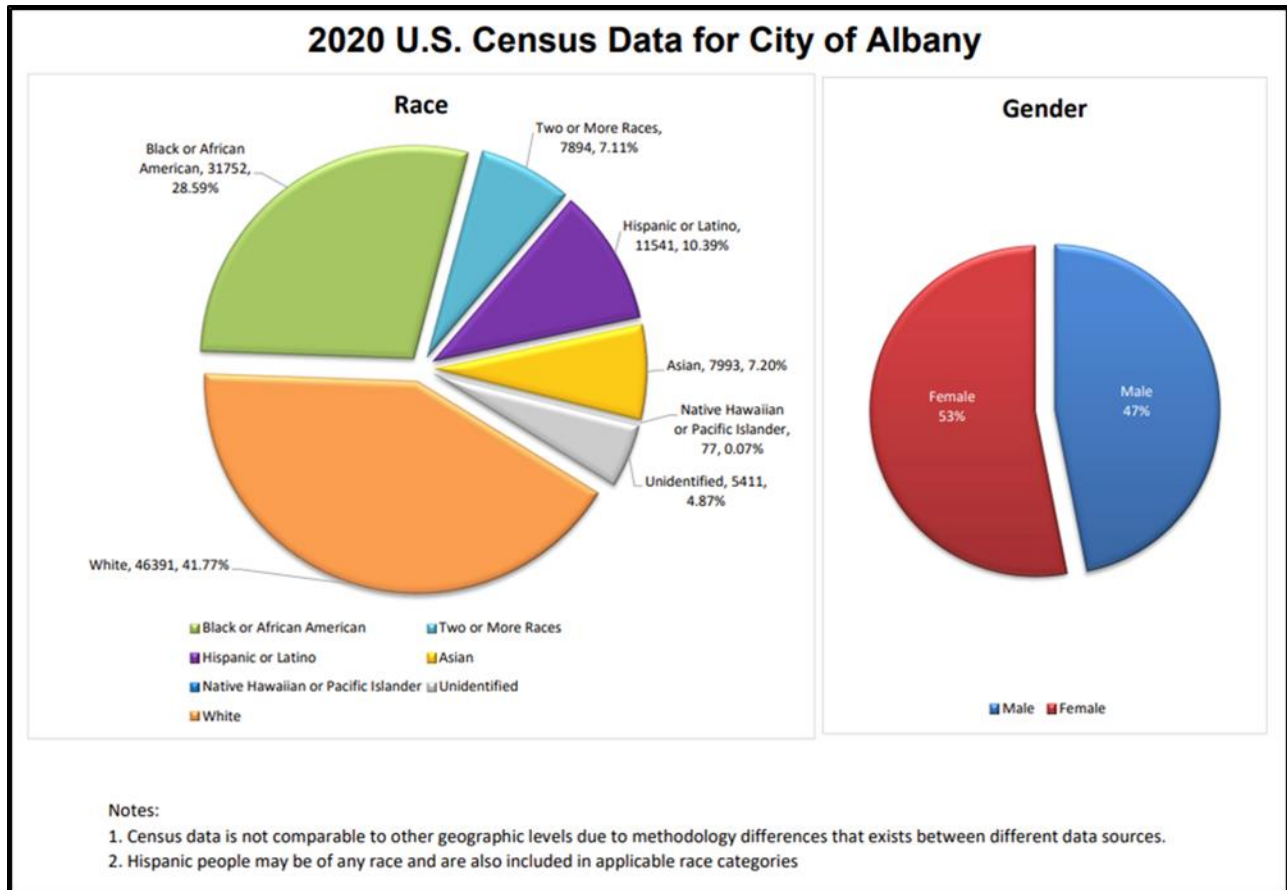

Job and Civil Service Exam Applicants - Gender Diversity by Race			
<b>White</b>	<b>89</b>	<b>Asian</b>	<b>2</b>

<b>Hispanic</b>	<b>13</b>	<b>Disclosed Gender But Not Race</b>	<b>8</b>
Male	11	Male	7
Female	2	Female	15

**Figure 37.** Job and Civil Service Exam Applicants – Gender Diversity by Race

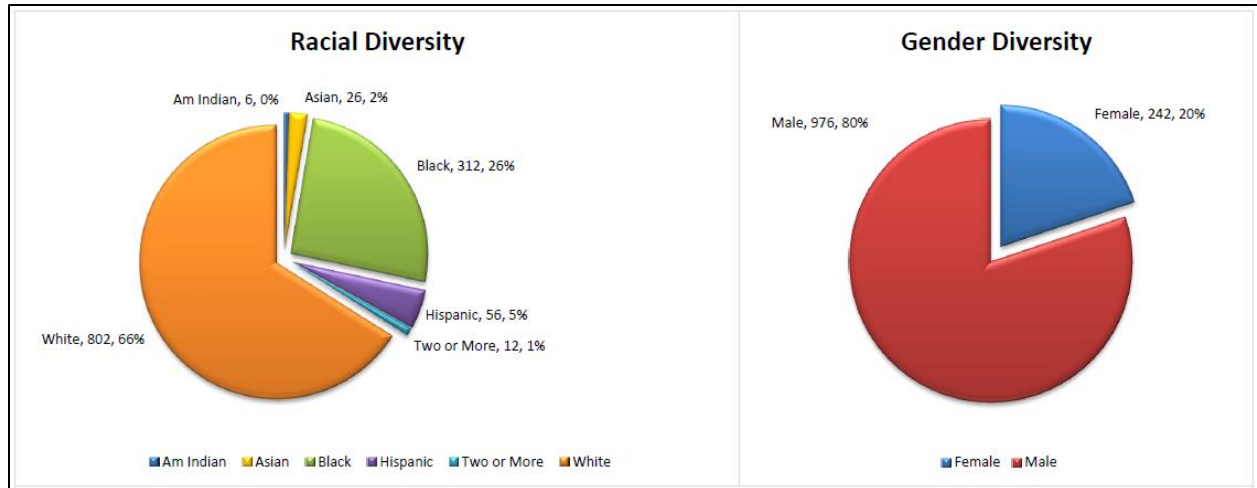

## Employee Demographics

The U.S. Census data refers to a comprehensive collection of demographic, social, and economic information about the population of the United States. This data is collected by the U.S. Census Bureau every ten years. The data includes details such as population size, age, race, ethnicity, household income, educational attainment, and housing statistics. It serves as a vital resource for government planning, policy-making, and allocation of resources. Below is a snapshot of the most recent U.S. Census Data.

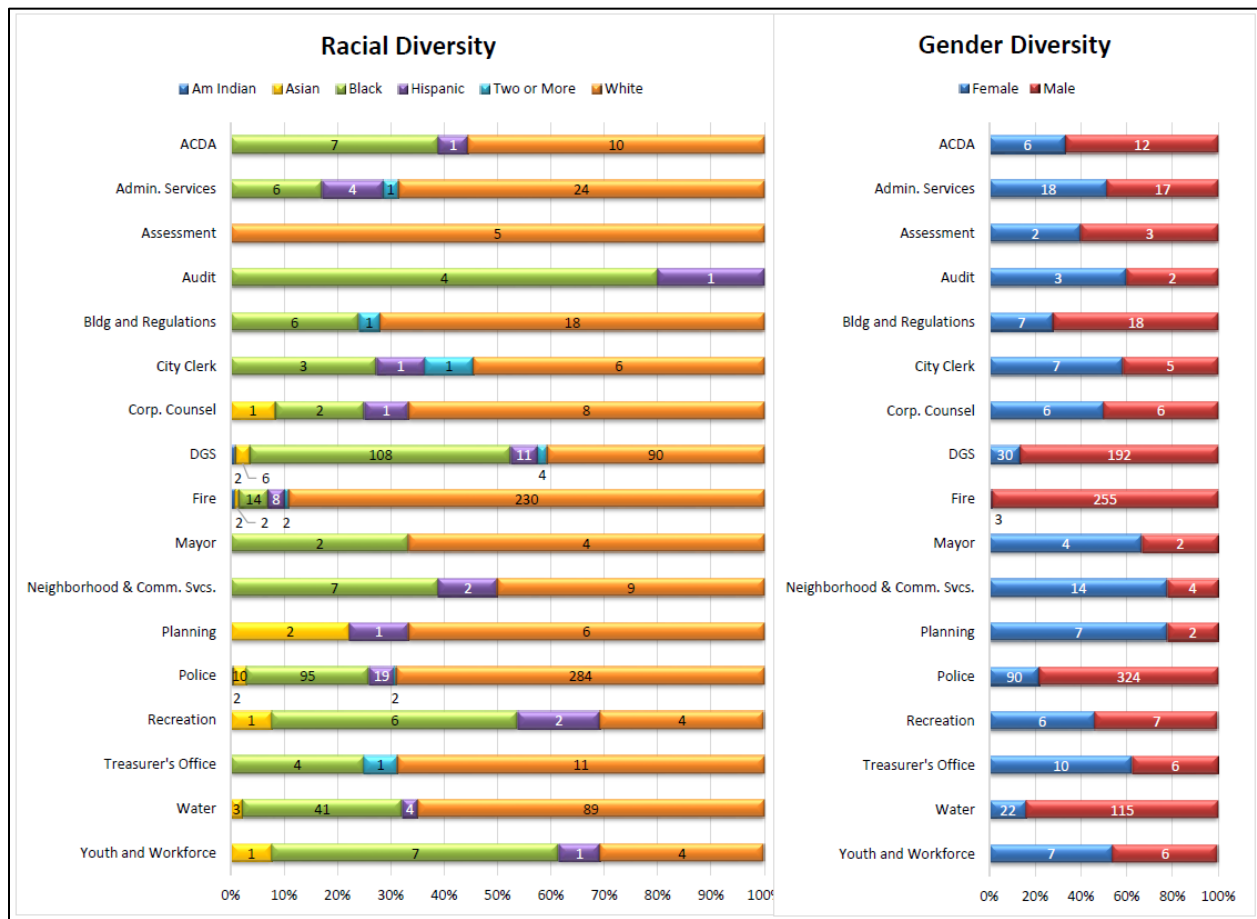

**Figure 38.** 2020 U.S. Census Data for the City of Albany

Below is a snapshot of the racial and gender diversity of the workforce as of December 2023. The U.S. Census Bureau and the Equal Employment Opportunity Commission (EEOC) classify race slightly differently. The City of Albany is required to report to the EEOC, so we utilize their labeling system, which is why the categories in the figure below slightly differ from the categories shown in the figure above.

**Figure 39.** City of Albany Workforce Diversity as of December 2023

**Figure 40.** City of Albany Workforce Diversity by Department as of December 2023

Lastly, the chart below shows the racial and gender diversity of the workforce, comparing December 2022 to the previous year.

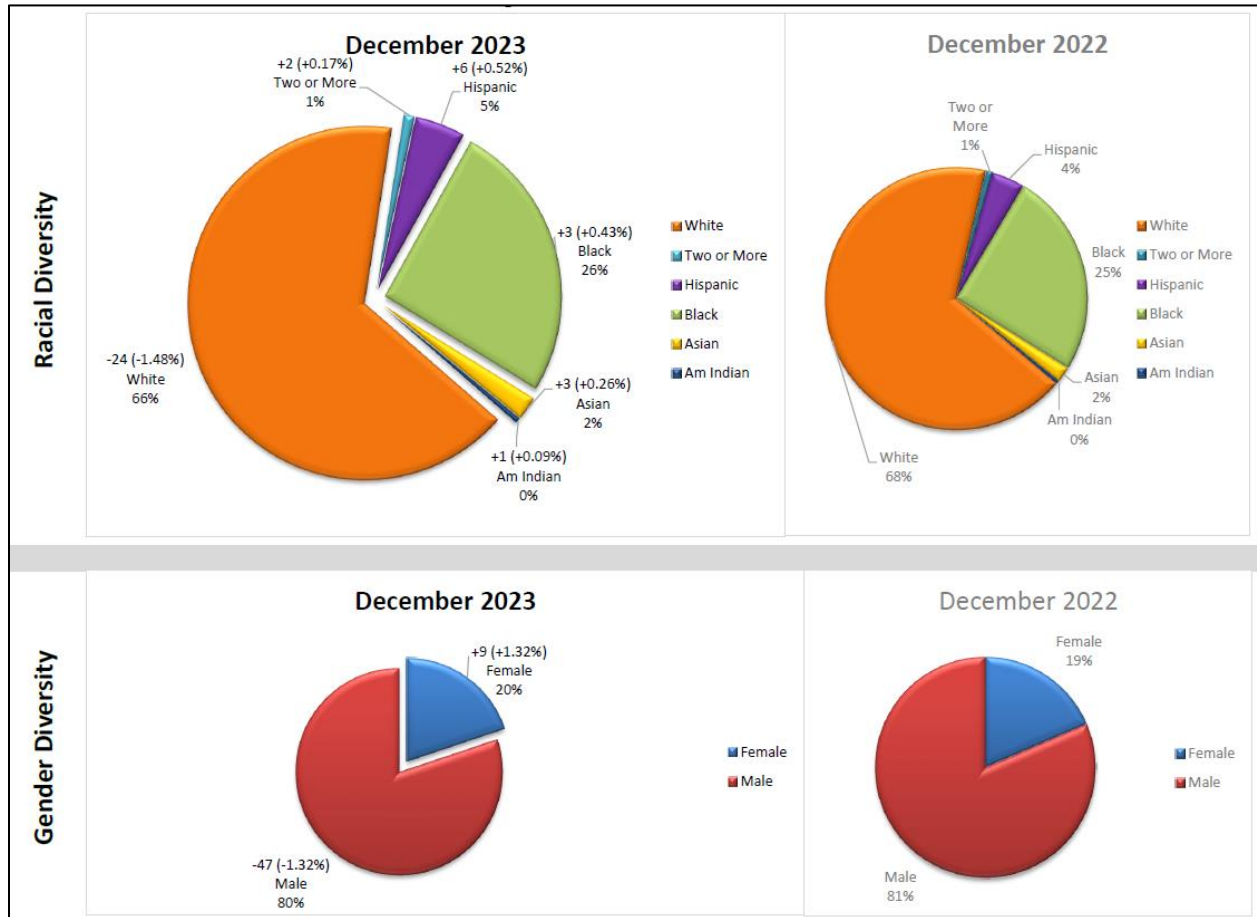

Figure 41. City of Albany Workforce Diversity – December 2023 vs. December 2022

## Employee Residency

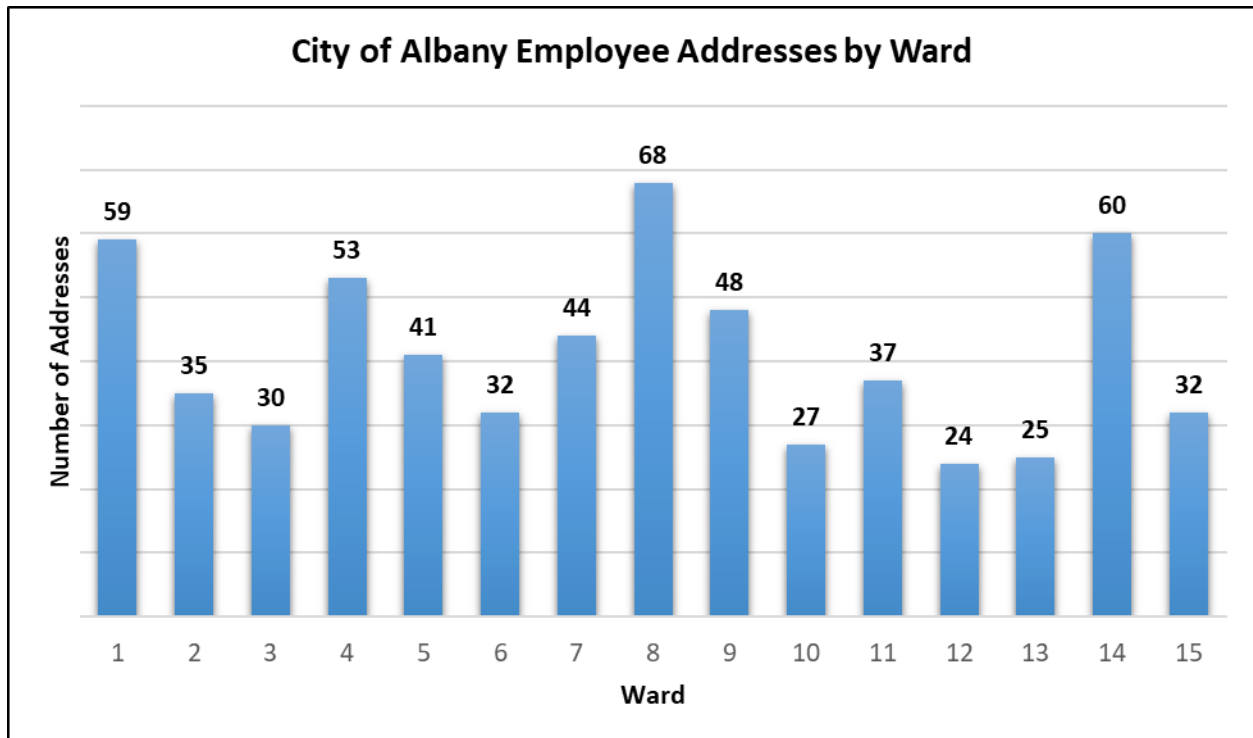

Local Law F-2014, which became effective on February 26, 2015 and can be found in Section 61-1 of Chapter 62 of the Code of the City of Albany, mandates residency for City of Albany employees. However, this mandate is not applicable to those who fall into the category of uniformed personnel due to New York State law. The legislation is written as follows:

*“Residency for new employees. Except as otherwise provided by the section, the Common Council hereby establishes a residency requirement for all prospective employees of the City. Every person initially employed by the City of Albany, shall, as a qualification of employment, be or become a resident of the City of Albany within 180 days of the date of initial appointment for said City. Furthermore, employees hired after the effective date of this section shall continue to be a resident of the City of Albany throughout their employment with the City, and the failure to move into the City, shall be deemed a voluntary resignation. The City may require annual proof of residency from affected employees.”*

In 2023, the number of City of Albany employees who are residents was 725 (or 58%) and the number of employees who are non-residents was 524 (or 42%). Of the non-resident employees, approximately 67% are sworn public safety personnel who are exempt from the residency requirement. Below is a map and chart of the location points of the residence addresses of employees in 2023.

**Figure 42.** Map of Current City of Albany Employee Addresses – City Residents Only

### Join Albany Recruitment and Retention Campaign

Across New York and nationwide, vacancies and municipal government have begun to impact service delivery to the public. This was only exacerbated by the COVID pandemic. Starting in 2020, we began to see a widening gap between the number of municipal employees and our city's ability to meet increasing public service needs. We recognized the need to address the hiring crisis head on.

The Department of Administrative Services received dedicated funding from a federal American Rescue Plan Act (ARPA) grant to develop and execute a campaign to fill vacancies across the City's diverse workforce. We needed to build a campaign that met people where they are, but also knew that traditional recruitment tactics would yield the same old results.

In 2023, the Department of Administrative Services launched the City's [Join Albany](#) campaign, a municipal employee recruitment and retention initiative seeking to attract and develop future city employees from diverse backgrounds.

#### Join Albany Campaign Development & Guiding Principles

- First the campaign embraced accessibility – aspects that you would not always think about to ensure the message that Albany is Hiring was received by everyone. For example, digital elements like responsive design, color contrast, keyboard accessibility, screen reader compatibility, font size and style and compliance with Web Content Accessibility Guidelines ensured this information reached people of all abilities in a method they preferred.
- The team conducted research and surveyed different groups, from Commissioners to members of the Albany workforce to residents - to gain insight into preferences and value propositions

which provided help in refining our messaging, branding and marketing strategies to better meet the expectations of our target audience – and call them to action.

- Then, we met people where they are. Our consultant worked with us to define the campaign’s target audience. The digital campaign used geofences to allow us to deliver highly localized and personalized content directly to the devices of potential employees in those specific regions. This approach significantly increased our engagement and conversion rates, as we were able to tailor our messaging to the unique preferences and interests of the individuals within each geofenced area.
- We designed a dynamic, easy to access website carefully crafted to showcase not just the incredible job opportunities Albany has to offer with pay and benefits, but also painted our city as the ultimate destination to live.
- We took a groundbreaking approach by simplifying job descriptions, demystifying them - breaking free from the constraints of Civil Service regulations that typically shroud such descriptions in bureaucratic jargon. We created a Civil Service 101 page to help people more easily navigate the Civil Service process. We also began hosting monthly Civil Service Workshops to give job seekers hands-on support with their applications.
- In all, the JoinAlbany.com website offered a fresh perspective, presenting job details in clear, plain language that everyone could easily comprehend. This ensured that prospective candidates could readily grasp the opportunities that awaited them, making the ultimate application process at the Civil Service page smoother and more accessible than ever before.
- Administrative Services also understood the importance of staying ahead by constantly refining our strategies to meet the unique needs of not only our diverse audiences, but our departments and city leadership.
- Our campaign became a living entity, shaped by real-time feedback and insights from both our internal departments and external stakeholders.
- With agility as our guiding principle, we swiftly identified priority roles flagged by various departmental leaders and highlighted them across our digital presence as well as on the JoinAlbany.com website to yield more attention and applications.
- By aligning our efforts to bridge talent gaps, we helped bring down departmental and citywide vacancy rates.
- See **Appendix G – Join Albany Campaign Samples**

### Join Albany Campaign – 2023 Highlights

- The Join Albany campaign yielded a **39.52% increase** in total civil service job applications filed for employment with the City of Albany.
- The 2023 Join Albany paid digital campaign yielded over **22M ad impressions** and more than **200k link clicks**.
- **138k+ individuals** visited pages on the Join Albany website over **540k times**, resulting in **2.8k forms of interest** submitted for open positions with the City.
- The greatest potential volume of website visitors is sustained by a paid digital program; supported by organic events, such as media coverage and career fairs, which also boost site traffic.
- Google Search Engine Marketing was the top source for both males and females between 25-34.
- Google Display and YouTube ads saw the greatest engagement from young professionals, primarily males, 45-54.
- Meta advertising saw greatest engagement from females over the age of 50, with comments predominantly focused on referring others to the post.
- During 2023, the City's vacancies were reduced from 212 to 163 and the vacancy rate was reduced by over 3 percentage points (25% decrease) year over year and the City of Albany reached it's top three months of lowest vacancy rate and open positions since 2021.
- In several departments, we've even reduced open rates by over 70%.

### Recruitment Events and Activities

The City of Albany Office of Human Resources attends and hosts career fairs and recruitment events on a regular basis. Below is a list of career fairs and recruitment events that the City of Albany held or attended in 2023 – it was our busiest year ever for recruitment with nearly 40 events attended.

Date	Career Fair and Job Communication Efforts
9-Feb	DOL Capital Region Virtual Career Fair
22-Mar	UAlbany Government & Non-Profit Career Fair
24-Mar	Youth & Workforce Services Monthly Job Fair
31-Mar	MSBK Career & Speed Networking Event
6-Apr	MLK Career Fair
12-Apr	College of Saint Rose Career Fair
19-Apr	Youth & Workforce Services Monthly Job Fair
29-Apr	Public Employee Federation Wellness Fair
19-May	Youth & Workforce Services Monthly Job Fair
26-May	Albany High School Career Fair
7-Jun	Youth Career Day for Summer Employment APL
14-Jun	Youth Career Day for Summer Employment APL
15-Jun	Alive at Five
21-Jun	Youth Career Day for Summer Employment APL
22-Jun	Alive at Five
23-Jun	Youth & Workforce Services Monthly Job Fair
28-Jun	Youth Career Day for Summer Employment APL
6-Jul	Alive at Five
13-Jul	DOL Capital Region Virtual Career Fair

20-Jul	Alive at Five
27-Jul	Alive at Five
3-Aug	Black Arts & Cultural Fest
4-Aug	Black Arts & Cultural Fest
5-Aug	Black Arts & Cultural Fest
9-Aug	Youth & Workforce Services Monthly Job Fair
10-Aug	DOL Capital Region Virtual Career Fair
11-Aug	SYEP Recognition Ceremony
26-Aug	John T. Harris Back to School Community Day
2-Sep	Stop the Violence
16-Sep	Hispanic Heritage Celebration
20-Sep	St. Rose Fall 2023 Career Fair
27-Sep	UAlbany Government and Non-Profit Job & Internship
1-Oct	Upper Madison Street Fair
4-Oct	UAlbany CPSP Community Service Fair
5-Oct	DOL Capital Region Virtual Career Fair
2-Nov	CRCC Career and Internship Fair
7-Nov	Shoprite Career Fair
4-Dec	Civil Service Workshop

**Figure 44.** Career Fairs and Job Communication Efforts in 2023

#### Other Recruitment Initiatives

- The Department of Administrative Services expanded job opportunities for workers with disabilities by including more job titles in the City's 55A program, which allows people with disabilities to bypass the Civil Service examination process for entry-level jobs
- In 2023 we also expanded our email and direct outreach initiatives to include an array of contacts from job training programs, Albany County Social Services, several school districts and public and community colleges. These partners receive automatic email alerts regarding job and exam opportunities.

### **Commission on Human Rights Findings & Recommendations**

#### **2023 Draft Equity Agenda Report Comments (Richard Conti)**

**In reviewing the draft Equity Agenda Report for the period 1/1/23-12/31/23 I have the following comments and observations based on a comparative review of the draft report with the corresponding provisions of the Equity Agenda ordinance (Chapter 183).**

#### **Equity Agenda Ordinance**

**The Equity Agenda Ordinance needs to be amended. In some respects, the ordinance specifies methodologies and departmental responsibilities that no longer exist. At the time it was written it tied itself to certain procedures as they then existed, but which have evolved over**

time. This makes measuring outcomes against the standards in the ordinance difficult. Much of the ordinance focuses on data collection and not enough on outcomes.

1. The ordinance needs a clear definition of equity and how outcomes are measured against that definition. “Equity” should define the establishment of “parity” which corrects prior neighborhood disinvestments. Some interpret “equity” as establishing equality in investment vs. “parity”. A clear definition of “equity” and a requirement that departments establish policies and procedures as to how they’ll achieve policy goals needs to be established.
2. As the Commission previously recommended, the ordinance needs to measure “equity” and investments based on neighborhood lines (which are maintained by the Planning Dept.) vs. ward lines. Ward lines are political boundaries which can split neighborhoods and actually impede the collection of neighborhood for planning and investment purposes. Development of neighborhood plans and grant applications are based on neighborhoods not wards. Also note that the draft report measures “equity” for the 2023 calendar year based on existing ward lines. The Common Council has already adopted new ward lines that will take effect in 2026. Based on the current reporting cycle, data on new ward lines won’t be seen until 2027 and then theoretically prior year data would need to be adjusted to reflect the new lines so that there’s a comparable basis of comparison. Whereas if neighborhood lines had been used from the beginning there would have been a consistent basis for comparison.
3. Generally, the Common Council and Mayor need to do a comprehensive review of the Equity Agenda ordinance to clarify its provisions and goals measurement.

### Equity Agenda Report

In terms of areas where there’s a need for further clarification:

1. DGS: the street rating methodology used in the draft report differs from the methodology used in prior reports and specified in the Equity Agenda. This is a key measure of capital investment, the Commission would benefit from clarification in this area.
2. See, Click, Fix: this system was previously maintained by DGS and has been moved to Dept of Neighborhood and Community Services. The Commission would benefit from a better understanding of this transfer and how it impacts its utilization for identifying capital investments by DGS. Also, is this the only recorded listing DGS uses to identify street and sidewalk issues?
3. Parks: the report indicates 73 parks, however the appendix only lists those 42 parks with amenities. Is a map identifying the geographic location of parks feasible?

4. DGS Engineering/Appendix D: the data is not presented in a comparative manner making year-to-year comparisons impossible. In addition, street and sidewalk reconstruction data (including speed humps) in an aggregate format making comparisons impossible. (Note: on p. 43 the 2020 Spring Street Complete Streets Project is listed in the 9<sup>th</sup> Ward, should be 6<sup>th</sup> Ward)
5. Violence Task Force: the Common Council's implementation of the Violence Prevention provisions of the Equity Agenda ordinance [sec. 183-2(B)(1)and (2)] is inconsistent with the ordinance. The Council has taken a rigid approach vs the more informal community-based approach envisioned by the ordinance, this has probably impeded implementation. In addition, the funding provisions of the ordinance were never implemented.

---

## Equity Agenda Report Evaluation (2023)

### Commissioner Love's Recommendations

#### Formal Recommendations for the City of Albany's Equity Agenda:

##### Recommendation 1: Documentation and Accountability

The City of Albany should develop a comprehensive annual report that:

1. Systematically documents progress on previous recommendations.
2. Provides detailed written updates to the Commission of Human Rights (CHR)
3. Tracks the resolution of identified equity challenges.

##### Recommendation 2: Operational Equity Implementation

The Equity Agenda requires a more robust methodological framework to operationalize its objectives, specifically:

1. Develop a transparent, data-driven methodology for identifying communities with the greatest systemic racism impacts.
2. Establish quantitative and qualitative metrics to measure equity progress.
3. Create a standardized annual assessment protocol for each city department.

##### Recommendation 3: Redlining Historical Integration

The historical context of redlining necessitates a strategic approach to contemporary urban planning:

1. Integrate historical redlining analysis into current decision-making processes.
2. Develop explicit protocols for addressing systemic housing discrimination in capital projects.
3. Implement comprehensive equity considerations in built environment investments.

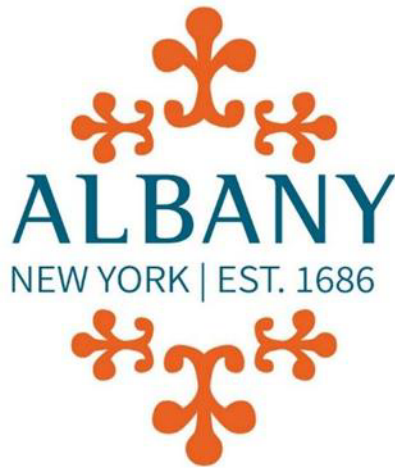

##### Recommendation 4: Workforce Diversity and Advancement

Address workplace inequities through a multi-dimensional strategy:

1. Conduct a comprehensive demographic analysis of city workforce representation.

2. Develop targeted recruitment and professional development programs.
3. Establish transparent pathways for upward mobility for historically marginalized employees.
4. Implement accountability mechanisms to track progress in workforce diversity and inclusion.

Each recommendation requires systematic documentation, transparent implementation, and ongoing evaluation to effectively address systemic inequities within municipal governance.

## Albany Water Department 2023 Equity Agenda Report

— DEPARTMENT OF —  
**WATER**  
THE CITY OF ALBANY, NEW YORK

DEPARTMENT OF WATER & WATER SUPPLY

KATHY M. SHEEHAN  
MAYOR

JOSEPH E. COFFEY, JR, P.E.  
COMMISSIONER

**Albany Water Department**  
**2023 Equity Agenda Report**  
**(reporting period 1/1/23-12/31/23)**

Department of Water & Water Supply  
10 North Enterprise Dr.  
Albany, N.Y. 12204

April 19, 2024

## **Background**

The Albany Water Board and Albany Municipal Water Finance Authority were created under Title 6, Section 1115 of the NYS Public Authorities Law. All water and sewer infrastructure in the City is owned by the Albany Water Board under Acquisition and Operating Agreements with the City dating back to 1987. The City of Albany Department of Water & Water Supply operates and maintains all water and sewer infrastructure in the City.

The Albany Water Board (AWB) and Albany Municipal Finance Authority (Authority) project a Five-Year Capital Improvement Program (CIP) annually for the water and wastewater system (System), which is comprised of water treatment, transmission, and distribution assets, as well as wastewater collection, conveyance, and satellite treatment facilities. The Authority is also required to complete an examination of the system every other fiscal year in accordance with the Water and Sewer System General Revenue Bond Resolution, adopted by the Authority on January 22, 1998.

### ***How does the Department determine which capital projects to pursue and how do we determine priority?***

The Water Department operates and maintains the system using an Asset Management platform and methodology that rates assets according to a matrix that assigns a risk of failure with consequences of the failure.

Before we discuss 2023 projects, an overview of our Capital Planning process is offered herein. Each year, an assessment of the AWB assets was completed based on visual inspections and interviews with AWB personnel regarding previous maintenance, inspection and/or performance records. The assessment was performed on the following assets:

- Supply Reservoirs (Basic Creek and Alcove)

- Six-mile Reservoir (Rensselaer Lake)

- Feura Bush Filtration Plant

- Loudonville Reservoir

- Treated Water Pump Stations

- Elevated Storage Tanks

- Sewer Pump Stations (Representative sample of the 30 stations)

Albany Water Department Office - (10 North Enterprise Drive and 35 Erie Boulevard)

Supply and Distribution System

Collection System

The intent of this system examination is to provide a planning level evaluation of the system, not to provide a detailed assessment of each asset. The recommendations from this evaluation include the need for more detailed assessment of certain assets that are either buried, are too numerous to evaluate under this assignment, and/or if there is insufficient historic data on the condition of the assets.

To supplement this assessment, the Department utilizes our Utility Cloud work plan and reporting platform for additional input to our Asset Management Plan,

Project descriptions and capital cost estimates provided by the AWB from this process are incorporated into the annual Capital Improvement Plan. The amount budgeted for 2024 is approximately \$42 million, which includes both water and sewer. This work will be undertaken using reserve funds, grant funds, Environmental Facilities Corporation (EFC) financing, and through bond funds.

This is the process by which capital projects are planned and selected. Projects selected are based on the probability of failure and the consequences of failure. Projects are implemented based on available funds and financing.

## **Water System**

The water system for the City of Albany consists of two supply reservoirs with a combined capacity of 13.8 billion gallons; a 48-inch diameter raw water system conduit, 8.3 miles in length; a filtration plant with a design capacity of 32 million gallons per day (mgd); a treated water supply conduit, 48 inches in diameter and 11.1 miles long; a distribution system containing approximately 370 miles of pipe of various diameters; and treated water storage facilities consisting of an open reservoir and two elevated storage tanks and one standpipe charged by pump stations.

Major conclusions with respect to the water system are as follows:

All major elements of the water system are in generally adequate condition.

The quality of treated water has consistently complied with regulatory standards.

The capacity of the water system is projected to exceed the demand of the service area through the year 2028.

The AWB has historically provided adequate service at staffing levels equivalent to those currently in effect.

Timely completion of the capital improvement program, along with adequate maintenance, should be sufficient to maintain the present level of service provided by the water system for the next five years.

Recommendations for repairs and upgrades were provided based on observations made by Arcadis (the official Consulting Engineer to the AWB), and discussions with the Albany Department of Water and Water Supply (AWD) staff. A summary of the condition of assets and recommendations for repairs or upgrades are provided in Appendix A. The Five Year Capital Improvement Program (2024-2028) Summary of Costs, lists the anticipated projects and project costs. The scope of work for these projects may not be fully defined so the costs shown may change during the five-year period. In addition, if costs for projects are higher than anticipated, some projects may not be included or completed within the five-year period.

## **Sewer System**

The sewer system consists of a network of sewers and sewage pump stations that receive approximately 25 mgd of sewage per day from the City for conveyance to two treatment facilities owned and operated by the Albany County Water Purification District (ACWPD).

The sewer system includes approximately 900 miles of sanitary, storm, and combined sewers; 30 sewage pump stations; and 22 overflow regulators which carry excess flow from combined sewers to 11 discharge points. The system is divided into eight districts and lies entirely within City limits.

Major conclusions with respect to the sewer system are as follows:

All major elements of the sewer system are generally in adequate condition.

The sewer system should be capable of handling anticipated sanitary sewage flows through the year 2028.

Timely completion of the capital improvements program, along with adequate maintenance, should be sufficient to maintain the present level of service provided by the sewer system for the next five years.

Recommendations for repairs and upgrades were provided based on observations made by Arcadis and discussions with AWD staff. A summary of the condition of assets and

recommendations for repairs or upgrades are provided in Appendix A. The Five Year Capital Improvement Program (2024-2028) Summary of Costs, lists the anticipated projects and project costs. The scope of work for these projects may not be fully defined so the costs shown may change during the five-year period. In addition, if costs for projects are higher than anticipated, some projects may not be included or completed within the five-year period.

***How does the Department measure the progress and impact of a project?***

- While projects are selected and implemented according to defined Asset Management protocol, the practical impacts of completed projects will reflect:
- Continued compliance with all regulatory and permit requirements;
- Continued operation of all critical facilities to ensure a continuous supply of safe drinking water and firefighting capacity;
- Reduce water service interruptions associated with main breaks;
- Reduce sewage backups associated with collapsed sewers;
- Replacement of all lead water services by 2034.

***How do projects address equity and parity throughout the City?***

The Asset Management system is applied system wide...for example, improvements made at our Alcove Reservoir, Feura Bush Water Treatment Plant, Loudonville Reservoir are investments made to ensure safe drinking water and fire protection are provided to all residents in the City. The Department does make a conscious effort to deploy sewer lining projects throughout the City in an effort to ensure these investments will extend the life expectancy of the sewer system in all neighborhoods on an ongoing basis.

***What types of requests does the Department get from the community in regard to capital improvements?***

The AWB meets publicly on a monthly basis and the AWB holds a public hearing on any rate increase. We do not receive any requests from the public thru these forums. We do receive requests from Common Council members and through See-Click-Fix, most often associated with water ponding in streets, and requesting new drainage structures. These requests generally result from street grade/paving issues. Since these requests are nearly always in the Combined Sewer System of the City, we cannot add new catch basins or storm runoff to the existing system due to requirements of the NYS Department of Conservation.

## **2023 Capital Projects**

The table in Appendix B identifies the 2023 Capital Projects, the cost of the project, location of the project and Ward. This section also includes project maps by ward for both cured-in-place pipe lining and lead service replacements, both of which occur city-wide.

### **Lead Water Service Replacement**

The Albany Water Department is working towards city-wide lead service line replacement in alignment with anticipated regulation changes with the EPA Lead and Copper Rule. Ideally, lead service replacement programming is completed in full block segments and at no cost to the homeowner with financial assistance to the City from the State and Federal governments. For homeowners initiating replacement of their lead water service prior to AWD's intervention, AWD implemented a program in 2021 to provide grant reimbursements to homeowners. AWD can provide additional replacement assistance when a water service extends into the street and is found to be leaking or samples at or above 10 ppb lead (see Appendix C). Low- and mid-income homeowners are also referred to Albany Community Development Agency grant programming which can cover utility work.

In this portion of our report, we will address:

#### ***How Replacements are Pursued***

1. Homeowner-Initiated Replacement – supplemented by AWD-provided grant programming. Grant programming is funded by water and sewer rates and is available to any homeowner replacing a lead line. Homeowners can also apply for ACDA grant programs when eligible for assistance. AWD will replace at no cost any lead service that extends into the street when a homeowner initiates replacement of the portion on private property when there is a leak, a sewer issue requiring excavation, or a sample at or above 10 ppb lead in the water at the property.
2. AWD In-House Replacement – AWD pursues replacements with in-house staff of services that are known to be originally copper or already replaced from the curb box to the house meter and remain to be lead between the curb box and the water main. Upon receipt of the anticipated street paving list, a replacement list is generated from historical record review and field investigation of services within street paving limits. This replacement list includes individual services previously partially replaced and remain to be lead only in the right-of-way as well as full block

segments found to be lead stubs from the water main connected to copper service lines to the homes. Prioritization is based on the street-paving list and therefore mimics equity addressed by the street paving list.

3. Find & Fix Replacement Policy – Beginning in 2024, AWD will contract and replace on an emergency basis any verified lead service line that samples at or above the EPA Action Level of 15 ppb lead within our compliance sampling program. In order to ensure the health and safety of sampling volunteers, properties that have a high sample reported from the AWD water quality lab will be listed for replacement by AWD contractor and removed from the compliance sampling program prior to the next round of compliance sampling.
4. Contracted Replacement – AWD pursues large-scale replacement projects when possible with capital planning or awarded grant funds from other entities. These projects replace lead lines in full and require homeowner consent. These projects occur in tandem with other capital project improvements or with dedicated funding. Projects are prioritized based on equity and construction logistics as defined below.

### ***Replacement Prioritization and Equity***

Criteria for prioritizing a street for a replacement project are defined in the table below:

Prioritization Criteria	Criteria Description
Street Paving	Minimize disruption and work towards complete streets by replacing lead services where paving is anticipated. Avoid prioritizing replacement projects on streets currently under moratorium.
DEC Environmental Justice Neighborhoods	Prioritize projects within NYSDEC EJ potential areas: <a href="#">LINK</a> These are historically redlined neighborhoods and neighborhoods likely to be adversely impacted by environmental factors.
	Prioritize projects within EPA mapped communities that are found to be medically underserved and communities where adverse impacts from lead are compounded by lead paint in homes: <a href="https://ejscreen.epa.gov/mapper/">https://ejscreen.epa.gov/mapper/</a>

Replacement Difficulty	Prioritize projects where replacement is made more difficult by water main location in the street as opposed to water main location in the lawn or sidewalk. Replacement is more expensive and less likely to be managed by a homeowner on their own.
Family per Service Density	Prioritize projects where tax records indicate higher density of multifamily homes and therefore more families served per lead service line.

### ***Measuring Progress and Impact***

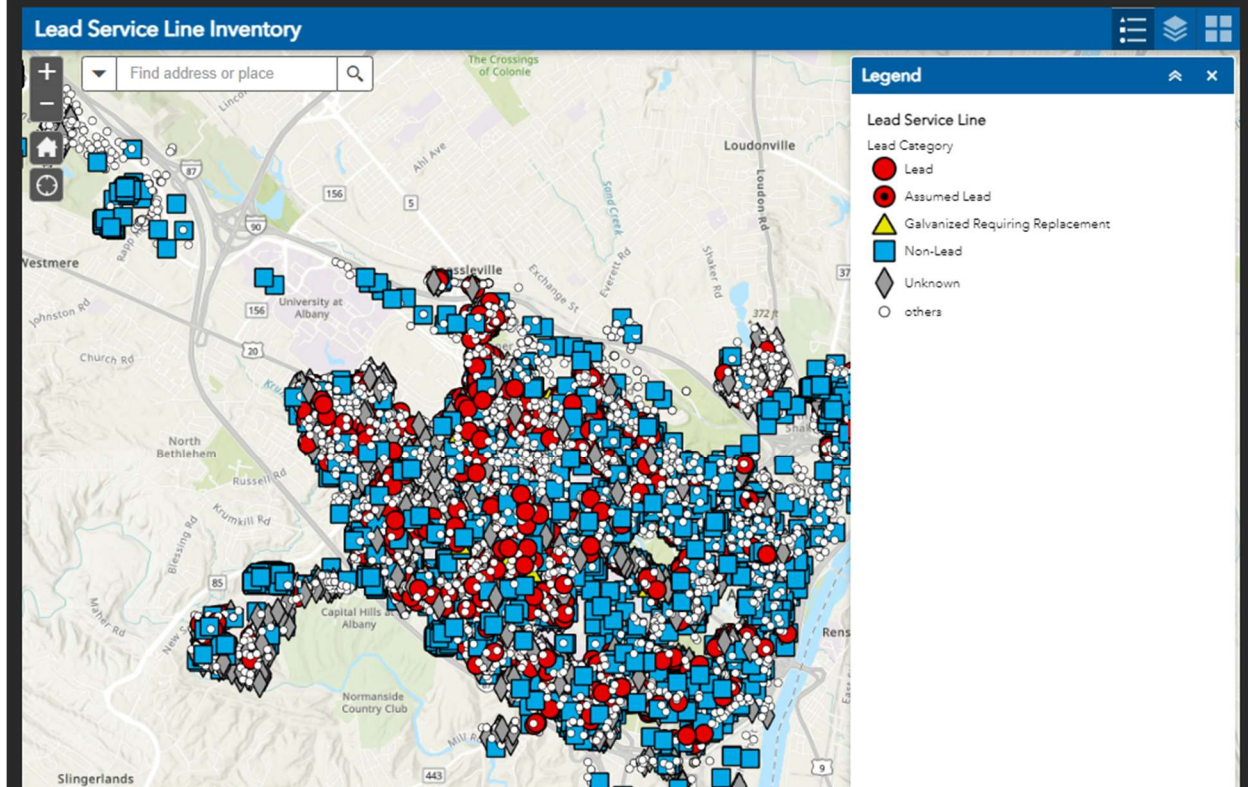

Since lead service replacement programming began in earnest in 2019, AWD has been measuring progress and impact of replacements. An interactive map of the full inventory of water services in the City of Albany is publicly available here: <https://lead-service-line-inventory-3-albanynywater.hub.arcgis.com/>

## Water Service Inventory Map

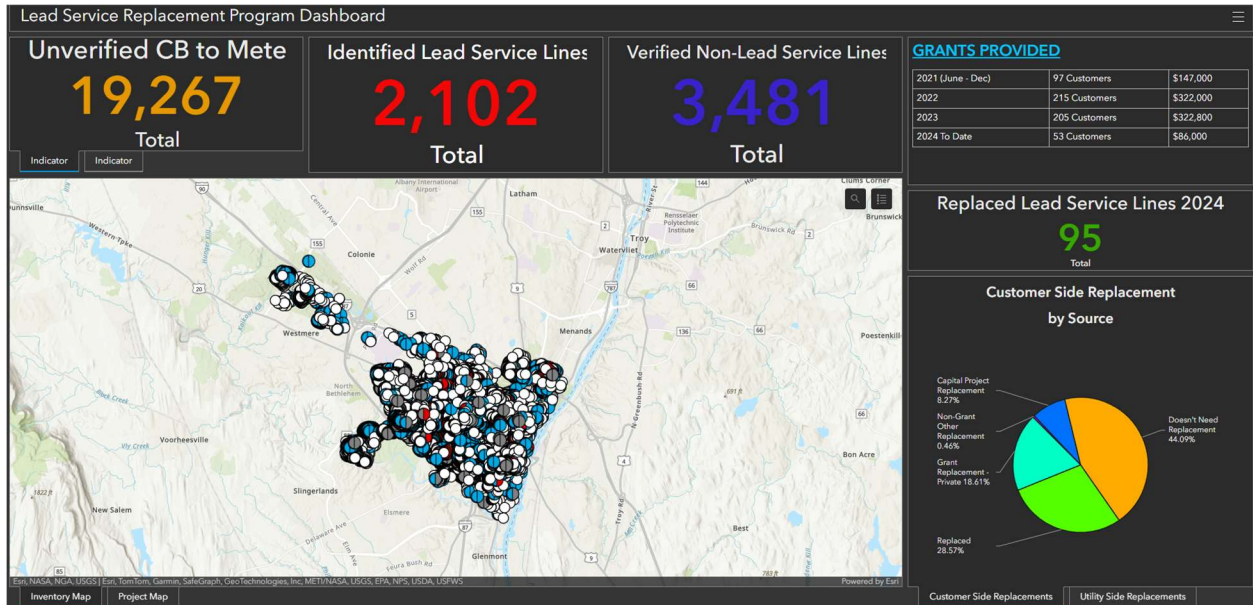

\*\*If you have submitted to the Water Department that you have a copper service inside at the meter, this information may appear as pending verification on the map below. The appearance of a copper service at the meter does not verify that the full extent of the water service is copper. Services often change from copper to lead in or just outside the foundation wall, so an historical record or exploratory dig must confirm the service material in addition.

Please call or email the Water Department if you have records for your home that differ from the information presented here.

In 2023, in addition to other standard replacement efforts in-house and through the grant, replacement data reflects large-scale replacement efforts on Hamilton Street (Ward 10) and Pennsylvania Avenue (Ward 5) with funding by ARPA grant. Both streets were scheduled for street paving, had difficult replacement construction with the water main being in the roadway as opposed to the lawn, fell within the DEC Environmental Justice neighborhood, and were likely to have compounded impacts from lead paint according to EPA mapping.

An internal dashboard is also used to track and report progress on our lead water service replacement program with drilled down data. A snapshot of the dashboard page follows:

Replacements are tracked by year, ward, and type and are mapped (refer to Appendix B for a snapshot of 2023).

### ***Community Involvement and Requests***

AWD communicates with customers regarding lead in water frequently. The most recent public communication can be found at [albanyny.gov/lead](http://albanyny.gov/lead).

In summary, AWD can assist with on-site lead line identification, provides resources for grants and water sampling for lead, and helps homeowners find a path to replacement or temporary filtration on a case-by-case basis.

# APPENDIX A

## Five Year Capital Improvement Program (2024-2028) Summary of Costs

Albany Water Board/Albany Municipal Finance Authority  
Five Year Capital Improvement Program (2024-2028)  
Projects Funded through Grants, Long Term Financing, and Ongoing Project Funds

Budget Code	Task Name	Source	2024	2025	2026	2027	2028	Future	Totals
	<b>Long Term Control Plan - CWSRF - C4-5402-14-00, 01, 02, 03, 04</b>		<b>\$5,965,453</b>	<b>\$1,924,786</b>	<b>\$3,243,302</b>	<b>\$272,627</b>			<b>\$11,406,168</b>
	Administrative		\$272,627	\$272,627	\$272,627	\$272,627			\$1,090,508
	Engineering, Bond Counsel, CDPRC, Auditor	C4-5042-14-04	\$272,627	\$272,627	\$272,627	\$272,627			
	BMPs/System Optimization			\$958,538					\$958,538
	Remove Liberty & Schuyler Overflow - Albany BMP-11 & 13	C4-5402-14-04		\$958,538					
	System Separation/Stormwater Storage		\$3,692,826		\$966,460				\$4,659,286
	Manor Ave - Cohoes SSS-14	C4-5402-14-04			\$966,460				
	Van Buren Street - Troy SSS-13	C4-5402-14-04	\$3,692,826						
	Satellite Treatment and/or Floatable Control Facilities		\$2,000,000	\$250,000	\$2,004,215				\$4,254,215
	Big C Disinfection & Floatables Control - Albany	C4-5402-14-02	\$2,000,000	\$250,000

# APPENDIX B

2023 Capital Projects

**2023 Capital Project Details**

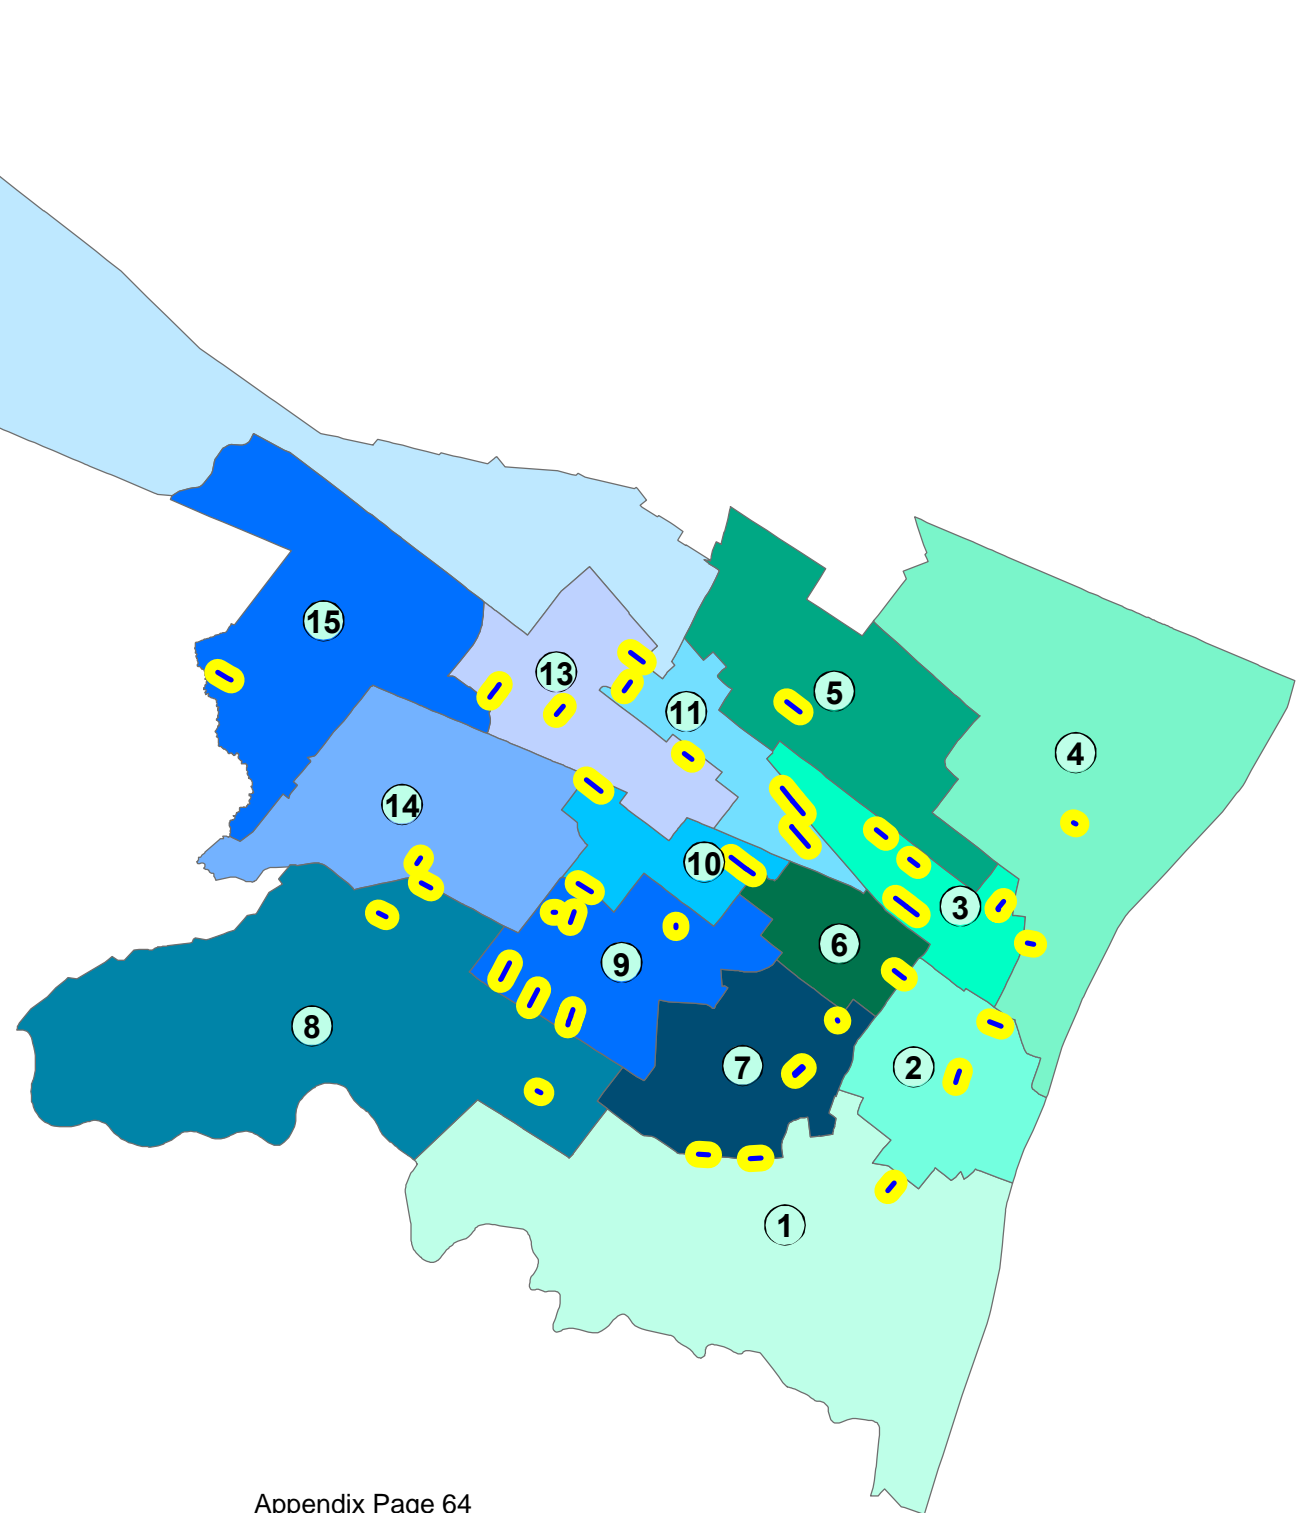

Project Name	Short Description	Location	Ward*	2021	2022	2023	Estimated Total Value of Capital Project	Completion Year
Installation of UV System Equipment	Construction for installation of UV system	Loudonville Reservoir	All			\$ 394,600.00	\$ 394,600.00	2023
2023 CIPP	Lined 12,000 linear feet of sewer in 35 pipe segments.	City-Wide	All			\$ 724,019.18	\$ 724,019.18	2023
ARPA Lead Service Replacement Project	Lead water line replacements prior to street paving. (ARPA-funded)	Pennsylvania Ave, Hamilton Street	5, 10			\$ 569,786.76	\$ 569,786.76	2023
2023 Water and Sewer Improvements	Philip Street Sewer rehab/ replacement, Krumkill Rd water main extension	Elm St to Park Ave, Krumkill near Aspen Cir	2, 14			\$ 540,488.40	\$ 540,488.40	2023
PRV Upgrades	Replacement of 13 PRV Valves around the city	Multiple locations	1,2,3,4			\$ 460,000.00	\$ 460,000.00	2023
McCormack Sewer Force Main	Replacement of force main at McCormack Road	McCormack Rd	8			\$ 285,000.00	\$ 285,000.00	2023
Governor's Mansion PRV	Replacement of PRV on Eagle Street	Eagle Street at Governor's Mansion	2			\$ 154,000.00	\$ 154,000.00	2023
Feura Bush Valves and Actuators	Replacement of valves and actuator equipment in filter gallery	Feura Bush, NY	All			\$ 108,087.65	\$ 3,084,200.00	2024
Beaver Creek Clean River Project Phase 2	South Treatment Plant Screen Upgrade	South Treatment Plant	All	\$ 788,170.03	\$ 1,249,836.93	\$ 33,190.65	\$ 2,172,620.64	2024
Beaver Creek Clean River Project Phase 2a	South Treatment Plant Influent Gate	South Treatment Plant	All			\$ 764,355.00	\$ 887,829.00	2024
Beaver Creek Clean River Project Phase 3/5	Treatment facility and diversion tunnel	Lincoln Park	All	\$ 11,373,324.55	\$ 13,474,045.61	\$ 10,142,167.23	\$ 37,157,839.00	2024

\* Listing of "All" represents a city-wide benefit

## Join Albany Campaign Samples

# Timeline

## Key Takeaways

- The Join Albany campaign yielded a **39.52% increase** in total civil service job applications filed for employment with the City of Albany.
- The 2023 Join Albany paid digital campaign yielded over **22M ad impressions** and more than **200k link clicks**.
- **138k+ individuals** visited pages on the Join Albany website over **540k times**, resulting in **2.8k forms of interest** submitted for open positions with the City.
- The greatest potential volume of website visitors is sustained by a paid digital program; supported by organic events, such as media coverage and career fairs, which also boost site traffic.
- Google Search Engine Marketing was the top source for both males and females between 25-34.
- Google Display and YouTube ads saw the greatest engagement from young professionals, primarily males, 45-54.
- Meta advertising saw greatest engagement from females over the age of 50, with comments predominantly focused on referring others to the post.

### GREAT BENEFITS

Generous. Comprehensive.  
Did someone say  
"pension?"

### CAREER OPPORTUNITIES

Want to move up at  
work? That's music to  
our ears.

### WORK-LIFE BALANCE

We believe our team  
should have a life  
outside of work!

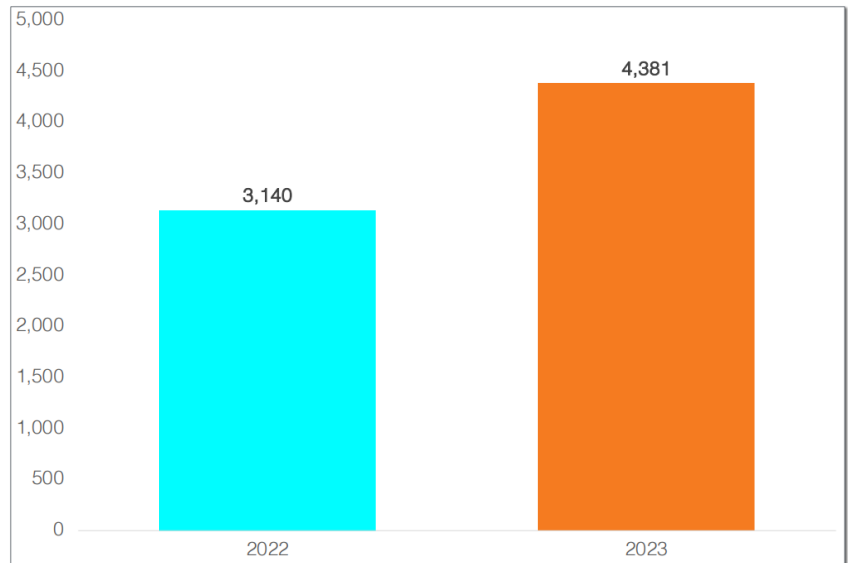

### MAKE A DIFFERENCE

No more waiting to see  
your impact, just look  
around at your community.

## Summer Youth Employment Program

DEADLINE TO APPLY  
3.31.2024

### SUMMER YOUTH EMPLOYMENT PROGRAM

## ARE YOU READY?

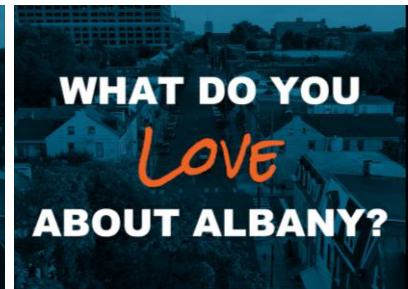

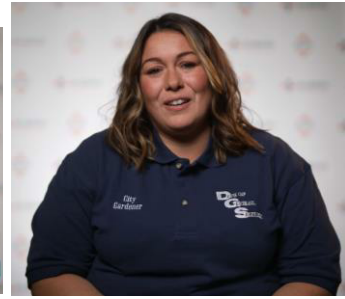

Now Accepting Youth Applications!

*I worked at the Municipal Services Division as part of their team. The best part of this experience was the support that each person in the office gave me - their kindness, respect, and patience toward me were the most beautiful things they gave me. Even though I was anxious, I could do my job well as always. The key part of this program for me is learning to remain calm when things are stressful and to respect supervisors and even individual people who are not. However, this was the best summer of my life. I want to thank the SYEP for their help and the hope they give to students who need a job.*

-Vanelia Anguilet, NYS Department of Civil Service Human Services
