

**Rachel M. Johnson, Vice Chair, Albany Water Board**

Rachel M. Johnson serves as Vice-Chair on the Albany Water Board. Ms. Johnson grew up north of Niagara Falls, NY and graduated from SUNY Buffalo with a B.S. in Mechanical Engineering. She later moved to the Albany area to work at Knolls Atomic Power Lab where she met her husband. After taking a brief hiatus to raise her two daughters who are now grown, Ms. Johnson returned to work at the Power Lab and is currently a manager whose team is responsible for US NAVY nuclear submarine inactivations at the three US public shipyards.

Ms. Johnson has loved living in Albany for over 2 decades. Highlights include being able to walk to the library, markets, music events, and pubs in the Albany Pine Hills area as her young daughters grew up. Ms. Johnson and her family love skiing, hiking, camping, water sports, and traveling. She is honored to be an Albany Water Board member and is proud to live in a city with so much history, albeit old plumbing...

In her 9 years on the Albany Water Board and as an engineer, Ms. Johnson has most enjoyed learning the workings of the water system and is constantly impressed by the great work that the Albany Water Department provides to the City of Albany.
