About the Project:

This project has been designed to improve mobility, safety, and access for all park users following the concepts that were originally recommended in the Washington Park / Center Square Complete Streets Study prepared in December 2022.

Based on public feedback from the first [Open House in October](#), the City and Creighton Manning have progressed the designs accordingly and will be presenting the proposed improvement plans intended for construction in Spring / Summer 2026. All comments received to date from the public, and the related responses from the City and Creighton Manning, will be made available on the project website prior to the meeting.

Please join us for this opportunity to help shape the outcome of this exciting project.
