

Mark North Point

***Please indicate all cross streets including adjoining streets.  
Please indicate if this is a corner lot.***

The diagram illustrates a rectangular lot with a smaller rectangular building footprint centered within it. The lot is bounded by a 'Rear Line' at the top and a 'STREET' at the bottom. The building is positioned such that there is a 'Rear Yard' between the building's rear wall and the rear line, and a 'Set Back' between the building's front wall and the street. The side walls of the building are flanked by 'Sideyard' areas. Dimensions are indicated by dashed lines with arrows and blank lines for user input.
