

2022 Second Quarter APD Arrests and LEAD Diversions

September 27, 2022

The following document presents an analysis of individuals arrested and diverted to LEAD in April, May, and June of 2022; these data are extracted from the Albany Police Department Record Management System and diversion documentation.

Table 1A depicts individuals arrested and diverted, and two diversion rates by race. The eligible diversion rate represents the number of diversions divided by the number of individuals arrested on **LEAD-eligible** charges plus diversions. The total diversion rate represents diversions divided by the total number of individuals arrested plus those diverted. Table 1B shows diversions over time by race. See Table 4B for figures on the City of Albany’s 2020 population by race/ethnicity.

This report primarily relates to **unique** individuals who were arrested or issued appearance tickets during the quarter, though they may have been arrested multiple times and/or on multiple charges, excluding cases where individuals’ names are “sealed”. “Eligible” means the charge was eligible for diversion, the crime was not domestic violence-related, and there were no warrants for the person’s arrest for previous infractions. Additional eligibility criteria are noted on page 3.
